

**Supplementary Table 3.** Coefficients of log linear model predicting log of metabolic ratio in urine after methadone intake

Parameter estimates	Variable	Estimate	Standard error	95% confidence interval	P value
$\beta_0$	Intercept	-0.394	0.3346	-1.065 to 0.2774	0.2444
$\beta_1$	Hepatitis C virus status	-0.1822	0.0656	-0.3138 to -0.05051	0.0076
$\beta_2$	Age	0.01381	0.007544	-0.001333 to 0.02895	0.073
$\beta_3$	Fibrosis-4 category	-0.1899	0.08053	-0.3515 to -0.02828	0.0222
$R^2$					27.76%
