SCHOOL OF MEDICINE

DETAILED PROPOSAL OF THE STUDY PROGRAM

INTEGRATED UNDERGRADUATE AND GRADUATE UNIVERSITY STUDY PROGRAM

MEDICAL STUDIES IN ENGLISH

SPLIT, June 2019

GENERAL INFORMATION OF HIGHER EDUCATION INSTITUTION

Name of higher education institution	University of Split School of Medicine
Address	Šoltanska 2; 21000 Split; Croatia
Phone	021 557-902
Fax	021 557-895
E.mail	diana.raos@mefst.hr
Internet address	www.mefst.hr

GENERAL INFORMATION OF THE STUDY PROGRAMME

Name of the study program	Medical Studies in English		
Provider of the study program	University of Split School of Medicine		
Other participants	No other participants		
Type of study program	Vocational study program ☐	University study program ☒	
Level of study program	Undergraduate ☐	Graduate ☐	Integrated ☒
	Postgraduate ☐	Postgraduate specialist ☐	Graduate specialist ☐
Academic/vocational title earned at completion of study	Medical doctor (MD)		

1. INTRODUCTION

1.1. Reasons for starting the study programme

USSM recognised an increasing need for international openness, mobility programs and international cooperation. Aiming to enhance international openness, Medical Studies in English yields all of its benefits. The Program was established in 2011/2012 academic year and enrols 50 students every year (there was an increase in enrolment quota from 30 to 50), which is in accordance with labour market needs. There is an insufficient number of medical doctors in certain areas in Croatia (islands, rural areas, etc.). The Program positively affects both the educational system and Croatian economy. Students from all over the world apply to our program, even though the majority of our students are from EU countries (such as Germany and Scandinavian countries). The program results in worldwide recognition of our medical educational system.

1.2. Relationship with the local community (economy, entrepreneurship, civil society, etc.)

Local community (economy, entrepreneurship, civil society, etc.) benefits from Medical Studies in English program due to students' living costs which extend up to 6 years' period. A number of students who are educated at USSM in Medical studies in English might become medical doctors serving our local community.

1.3. Compatibility with requirements of professional organizations

1. Medical studies in English Program is in accordance with Croatian professional Association – the Croatian medical chamber

2. Upon graduation it is guaranteed that a person has acquired the following competences:

- Understanding of science and scientific methods including principles of biological functions, estimation of scientific facts and data analysis

- Understanding of structure and functions of healthy and ill patients as well as the connection between health and physical/social environment

- Mastering of clinical procedures

- Performance of clinical procedures supervised in hospital institutions

1.4. Name possible partners outside the higher education system that expressed interest in the study programme

Partners who have expressed interest in our study include:

Clinical Hospital Centre Split, Spinčićeva 1 and Šoltanska 1
Community Health Centre of Split – Dalmatia County, Kavanjinova 2
Department of Emergency Medicine of Split-Dalmatia County, Spinčičeva 1
Clinical Hospital Centre Split Split physical rehabilitation centre, Marmontova 4
Dental Clinic Split, A. G. Matoša 2
General Hospital Dubrovnik, Dr. Roka Mišetića 2
General Hospital Zadar, Bože Peričića 5
*Psychiatric hospital Ugljan***.** Otočkih dragovoljaca 42
Psychiatric hospital Rab, kampor 224
Split-Dalmatia County Pharmacy Split, Mihanovićeva 35 i Table 21

1.5. Financing

Medical Studies in English Program is not financed by the Croatian Government. All costs are covered by independent financial means (annual tuition fees and application fees).

1.6. Comparability of the study programme with other accredited programmes in higher education institutions in the Republic of Croatia and EU countries

We have looked up to German medical universities for the most part (Chenot J.-F. Undergraduate medical education in Germany. GMS German Medical Science. 2009;7:1-

11.) since Medical Studies in English Program is organized in the same way as the Medicine program in Croatian. The University in Heidelberg was of special interest to us since it is oriented towards teaching and conducting of scientific research, high-quality diploma thesis writing and flexibility of clinical rotation organisation.

a) In relation to other EU Universities, we have looked up to Scandinavian universities in terms of:

b) Verticalization of courses (clinical skills courses)

c) Verticalization of clinical medical humanities courses (Lausane and Vilnius universities)

d) Verticalization of research of biomedicine and health courses – our medical school was the first to verticalize this course

e) Psychological medicine course (School of Medicine in London (King's College), Glasgow, Cardiffu, the Netherlands – Utrecht, Belgium – Antwerpen, Sweden –
f) Göteborg)

g) Familiy medicine (University of Ljubljana, Slovenian professor Igor Švab is professor at our school of medicine as well)

h) Medical Immunology and genetics (University of Edinburgh)

i) Laboratory Diagnostics (University of Padova, 1st Medical faculty Charles University, Prag)

j) Gerontology is recommended as an undergraduate course and we have implemented basic gerontology into Internal medicine course (World Health Organization, International Association of Gerontology and Geriatrics, Geriatric Medicine: basic contents for Undergraduate Medical Teaching)

k) We have implemented naval Medicine into our 5th year course Occupational and Naval Medicine with Environmental Health. We are the first European country to implement Naval Medicine into an obligatory course.

1.7. Openness of the study programme to student mobility (horizontal, vertical in the Republic of Croatia, and international)

Due to program differences it is very difficult to find partner universities where our students would attend compatibile courses within a given time period. Even ERASMUS mobility program does not offer a solution to this problem since it requires students to attend universities abroad for 3 months.

Medicine program in Croatian has enabled students to work abroad and attend their electives during summer. We aim to do the same thing for our international students since that is more practical option.

1.8. Compatibility of the study programme with the University mission and the strategy of the proposer, as well as with the strategy statement of the network of higher education institutions

Medical Studies in English program is compatible with the University mission and the strategy of the school of medicine.

The University mission is to contribute to the society through development of higher education and lifelong learning programs, high quality research and scientific activities, art and professional wok in accordance with work ethics.University fo Split as a public university considers knowledge to be public good which is constantly carried out and enhanced through innovation and its implementation in local community, especially economy. Knowledge enhancement is the basis of University strength and autonomy. The key effort is to motivate students to engage into scientific work, education and innovation in order to make them pioneers in their fields.

University of Split strategy is based on the following documents:

- European strategy for smart, sustainable and inclusive growth, EUROPA 2020
- Strategy document European Research Area, ERA
- Strategy document European Higher Education Area, EHEA
- Strategy of education, science and technology, the Republic of Croatia

1.9. Current experiences in equivalent or similar study programmes

Medical education in Split began in 1974., when the University of Zagreb School of Medicine established the 4th and 5th years of medicine program in Split. The complete five year study program began in 1979. The University of Split School of Medicine was established as an independent university in 1997.

Medical studies in English Program was established in 2011. University of Zagreb School of Medicine is the only school to deliver Medical Studies in English Program as well. Even though Medical studies in English Program is the first international program at our University, it reflects the same quality level as the previously established general medicine program in Croatian.

2. DESCRIPTION OF THE STUDY PROGRAM

2.1. General information

Scientific/artistic area of the study programme	Biomedicine and health
Duration of the study programme	6 years
The minimum number of ECTS required for completion of study	360
Enrolment requirements and admission procedure	in accordance to public call requirements

2.2. Learning outcomes of the study program (name 15-30 learning outcomes)

Learning outcomes of the study program will be determined in cooperation with other medical schools in Croatia (Zagreb, Rijeka, Osijek).
Upon graduation, graduated students acquire the following competences:

LO1. Explain and relate knowledge from the basic natural and medical sciences.

LO2. Describe and relate knowledge about the normal structure, molecular, biochemical and cellular mechanisms, the function of organs and organ systems.

LO3. Explain and relate the abnormal of the structure and function of organs and organ systems of the body, evaluate and argue the causal relationship between internal and external factors and the individual's behavior.

LO4. Describe the various causes of diseases (genetic, developmental, autoimmune, degenerative, toxic, metabolic, and neoplastic) and the disease mechanisms.

LO5. Describe and relate knowledge about pathological and clinical manifestations of diseases and apply it in the diagnosis and treatment of diseases.

LO6. Identify the importance of scientific methods in basic, translational and clinical research.

LO7. Connect and apply knowledge about clinical, laboratory and imaging manifestations of the disease state and interpret and conclude in terms of differential diagnosis.

LO8. Assess the functional forms and content of interdisciplinary cooperation and apply good practice of participating in multidisciplinary teams at all levels of health care.

LO9. Evaluate and apply the protocols and algorithms of preventive, diagnostic and therapeutic procedures according to current guidelines for the treatment of diseases.

LO10. Assess the rationality and safety of therapy based on knowledge and evidence that contribute to medical care, treatment outcomes, and health maintenance.

LO11. Evaluate and develop the principles of good medical practice, medical ethics, and deontology.

LO12. Assess the importance of socioeconomic, psychological, environmental and other non-biological determinants that contribute to the maintenance of health and/or disease development.

LO13. Conduct a medical interview, comprehensive history-taking and physical examination to obtain information relevant for working and differential diagnosis.

LO14. Develop the plan for management and rational selection of laboratory examinations, interpretation of their results, and interventions for disease diagnosis and treatment.

LO15. Adjust the way of explaining of the health information on the disease/diagnosis to other healthcare and non-healthcare professionals in accordance with the patient's and family members' level of health literacy and with the patient's consent.

LO16. Explain the content and get informed consent of the patient for the diagnostic and therapeutic methods

LO17. Apply specific forms of digital communication with the patient to identify the need for therapeutic interventions, report side effects.

LO18. Apply learning methods that enable postgraduate specialist training, lifelong learning and doctoral education in the field of biomedicine and health.

2.2. Employment possibilities

Upon graduation, the student employment is regulated with the Act on Medical Practice (Croatian National Gazette nb. 121/03 and 117/08). In order to practice medicine independently, Croatian doctor of medicine needs to hold a Croatian medical degree or an international recognized medical degree, pass state examination, register with the Croatian medical chamber and hold a medical licence for independent practising.

The doctor is obligated to renew his/her licence every six years. Upon passing the state examination or a few years of work in primary health care, many doctors choose a clinical, preclinical or public health specialities after which they can choose a subspecialty. Doctors can attend and graduate from postgraduate studies, conduct clinical science research and become a teacher at our school of medicine. Fewer doctors choose scientific work in basic medical sciences. These doctors are obligated to enrol into a postgraduate program. Many of them become university teachers and few of them get employed by other science institutes.

2.4. Possibilities of continuing studies at a higher level

Upon graduation, doctors of medicine have a right to enrol in a three year postgraduate study program (180 ECTS credits) in the field of biomedicine and health. They are eligible to enrol in other postgraduate studies in similar field according to regulations of each study program.

2.5. Name lower level studies of the proposer or other institutions that qualify for admission to the proposed study

It is not possible to enrol into general medicine program from any other lower level studies.

2.6. Structure of the study

The academic year lasts from October 1st until July 15th, so that the prescribed number of teaching hours (5 500, XII semesters) can get realized without changing the advised number of 25-30 hours per week. The academic year is not divided into semesters, but rather teaching blocks for each course.

After the teaching block finishes, students get a couple of free days in order to revise for the exam (including weekends and holidays) after which the first examination period is organized. The number of free days is determined by the length of the course itself. The second examination period lasts from July 16th until July 31st. The third and fourth examination periods are in September. The forth exam term is always the Committee exam. A student who does not have 42 ECTS credits at the end of the academic year has to re-enrol into the same study year, and those who have 42-60 ECTS credits enrol into the higher year of their studies. Those courses that students fail to pass have to be attended again and the exam has to be retaken. Students have a right to enrol courses of the higher study year but the maximum number of total number of ECTS credits per year should be 60. Specific and general enrolment criteria are described in table 2.12., List of obligatory and elective courses.

2.7. Guiding and tutoring through the study system

Consultations are the main form of guiding and tutoring through the study system and are organized for each course separately. In case of severe psychophysical students' problems, the Committee for teaching is responsible for their education and well-being.

2.8. List of courses that the student can take in other study programmes

At this point, there is no such possibility.

2.9. List of courses offered in a foreign language as well (name which language)

The entire study program is organized in the Croatian language as well.

2.10. Criteria and conditions for transferring the ECTS credits

As we have previously stated, it is very difficult to find a partner international or national University where our students would be able to attend exact courses as in Split in a given time period.

Since medicine is a regulated profession and our study program is quite extensive (5 500 hours), it was not possible to find courses that our students would attend elsewhere and, consequently, ECTS credits that would get recognized by our medical school.

For that reason we have focused on giving students the opportunity to complete a part of classes during summer or in any other way. Such classes would get recognized as one elective course (2 ECTS credits).

Moreover, we will encourage students to complete obligatory classes outside the school whenever possible since the main aim is to recognize those courses including both ECTS credits and the grade.

2.11. Completion of study

Final requirement for completion of study	Final thesis ☐ Diploma thesis ☒	Final exam ☐ Diploma exam ☒
Requirements for final/diploma thesis or final/diploma/exam	Requirement for diploma thesis submission is passing of all exams, and requirement for diploma exam is completion of Clinical rotation: Medical Emergencies	
Procedure of evaluation of final/diploma exam and evaluation and defence of final/diploma thesis	The quality of graduation thesis and public thesis defense is graded. Graduation thesis quality is graded with 0-50 points, and public thesis defense is graded with 0-50 points. Grades: sufficient 56-65 points, good 66-75 points, very good 76-85 points and excellent 86 and more points.	

2.12. List of mandatory and elective courses

YEAR OF THE PROGRAM	Hours	ECTS
1st YEAR	820	60

List of elective courses

Course	
1	“Test tube” baby
2	Acid-base disorders: from physiology to practice
3	Basic principles of cardiac electrophysiology and bioenergetics
4	Case studies in pathophysiology
5	Clinical cases in neuroanatomy
6	Communication Skills for Medicine I
7	Doctor, my back is killing me
8	ECG Challenges in Clinical Practice
9	Head trauma
10	Hello Kidney
11	How to reach 100?
12	Medicine of the future
13	Pathophysiology of endocrinopathies
14	Research protocol for your diploma thesis
15	Science for society – responsible research and innovation
16	Secrets of sleep across the lifespan
17	Sport and steroid abuse
18	Statistics in your diploma thesis
19	Sudden death
20	Physics overview (selected topics)

<tr><td colspan="6">COURSE DESCRIPTION</td></tr>
<tr><td>Course enrolment requirements and entry competences required for the course</td><td colspan="5">Not applicable.</td></tr>
<tr><td>Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</td><td colspan="5">A) Knowledge (remembering, understanding, applying, analyzing, synthetizing) measurable outcomes:
(1) explanation of concepts of anatomical terminology,
(2) description of common characteristics and distinguishing specific differences each general type of organ belonging to a particular system:
(a) somatic structures (skin, fascia, skeletal muscles, bones & joints),
(b) visceral structures (glandular/solid organs & mucosal lined tubes of smooth muscle/hollow organs),
(c) supply structures; vessels and nerves (somatic & visceral)
(3) division/subdivision of the human body into regions (demarcated by ‘anatomical landmarks’) and description/construction of anatomical structures, which contribute to a common function, into (organ) systems,
(4) application of fundamental anatomical knowledge to clinical situation/scenarios,
(5) demonstration of the surface markings of clinically important structures, on normal living bodies and the correlation of structure with function (for important movements, actions & reflexes),
(6) association of knowledge of systemic/topographic anatomy and physical examination of a patient,
(7) comparison of the appearance of normal structures in radiological images (plain radiographs, contrast studies, CT, MRI and ultrasound),
(8) interpretation of the appearance of the human body in sections at important levels and planes.
(9) recognition of various parts on naked-eye appearing cut-sections and dissected preparations of normal viscera.
B) Skills (perception, readiness, leading) measurable outcomes:
(1) to be able to recognize, manipulate, orient/site, group together, pull apart:
(a) exposed anatomical structures and regions (specimens and models),
(b) surface markings on normal living bodies,
(c) structures on cut sections of normal isolated and in-situ viscera,
(d) sections of the body at important levels and planes.
(2) communication skills (oral) to describe and explain (on daily basis) anatomical characteristics of normal structures,
(3) skills in the (supervised) manipulation and instrumentation of anatomical structures (with dissecting instruments) and in performing basic clinical skills</td></tr>
</table>

<table>
<tr><td></td><td colspan="6">(suturing, i.m. injections, catheterization, endo-tracheal intubation, lumbar puncture) on dead body.
C) Attitudes (acceptance, reaction, adoption of values) measurable outcomes:
(1) appreciation of the range of normality of the living human body (normal variation) due to age, sex and body build and the effects of posture, phase of respiration and pregnancy,
(2) acceptance of common occurrence of anomalies (anatomical variation), which differ from ‘text-book descriptions’ of the typical case,
(3) acceptance and toleration of practical work with human remains and appreciation of the ‘body donor program’ at anatomy department,
(4) recognition of (and adjustment to) the need for continuing independent (and collaborative) learning and acquiring knowledge relating to structures of the human body, to keep pace with future studies and professional development.</td></tr>
<tr><td>Course content broken down in detail by weekly class schedule (syllabus)</td><td colspan="6">Human anatomy studies normal structure of the human body. The aims include covering the description of macroscopic characteristics of the principle body organs (including their supply). In a systemic approach organs are grouped according to their common function. The focus of teaching is on the basic and common anatomical principles important for understanding the structure and the function of the human body. In addition to the systemic approach, the topographic anatomy is also represented and includes studying of characteristics of organs and organ systems in relation to their position in the body and their relations to the nearby structures. In topographic (regional) approach the organs are grouped according to their location and position in the body.
In practice all organs belong to an anatomical region and are part of a body system. Teaching units are organized so they cover topographic anatomy of the head, neck, upper limb, trunk and lower limb.</td></tr>
<tr><td>Format of instruction</td><td colspan="3">☒ lectures

			34	34	32	100
Status of the course	Mandatory	Percentage of application of e-learning	0%			

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Not applicable.
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Identify, describe and explain the basic concepts of the modern biological science, necessary for diagnostics and treatment of illness as well as the future of medicine in general. Name and discriminate specialist vocabulary needed to read up-to-date biomedical literature. Identify, explain, analyze, and finally link and integrate the cell biology, molecular biology, developmental biology and genetics with emphasis placed on human being. Students will be actively involved in lectures, seminars and exercises with the problem-based teaching model adopted. Such model enables students to develop simple, practical communication, explain basic biological processes and create critical thinking based on the knowledge of modern biological science that has been acquired during the course.
Course content broken down in detail by weekly class schedule (syllabus)	Principles of Molecular Cell Biology (DNA structure, replication, transcription, translation); Biology of the Cell (structure and function of cell components – e.g. cell organelles, cell communication, cell cycle, apoptosis); Developmental Biology and Genetics (fertilization and early embryonic development, teratogenesis, principles of genetics, prenatal diagnosis, molecular biology of cancer, human genome).
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

			12	35	23	70
Status of the course	Mandatory	Percentage of application of e-learning	0%			

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Not applicable.
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	A student becomes able to relate the basic empirical facts of functioning of the biological system with physical laws and simple models. S/he is encouraged to use the quantitative, deductive approach in the biological system analysis. She/he distinguishes radiogram from scintigram, echogram or magnetic resonance tomogram, understands how these images are obtained, what they display and which purpose these basic modalities of medical imaging serve.
Course content broken down in detail by weekly class schedule (syllabus)	Elementary atomic physics; Biotransports; Membrane potentials; Action potential; Biomechanics; Physics of ear and hearing; Physics of eye and vision; Physics of heart and circulation; Elementary nuclear physics; Interaction of radiation and mater; Radiation protection; Physics of nuclear medicine; Radiology physics; Magnetic resonance imaging; Physics of ultrasound.
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Not applicable.					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Differentiate health and disease, vital and health-related outcomes, and risk factors. Describe social determinants of health and disease in individuals, families and communities, as well as the health needs of individual and primary groups, especially hard-to-reach and vulnerable populations. Describe main demographics and specific issues in different age groups. Understand principles of medical ethics and apply these early on in the medical school course.					
Course content broken down in detail by weekly class schedule (syllabus)	Roles and tasks of social medicine as part of the medicine as a whole. Health, measures of health. Disease and its natural course. Factors that influence health of an individual and the community. Health, population and economic development. Population politics. The influence of primary social communities on the health of an individual. Health and disease in the life cycle (childhood, adolescence, adulthood, old age). Health behavior and the principles of health education. Basic communication skills with the patient/ individual. Socio-medical problem and the basics for its management. Basics of the social and health needs analysis of vulnerable population. Basic principles of medical ethics and ethics of medical students.

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Not applicable.
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	By the end of the course, a successful student should be able to: Describe: 1. the general principles of spatial planning of patient rooms; 2. the use of furniture, equipment, instruments and disposable materials; 3. vital body functions and their monitoring; 4. symptoms and signs of organ and system failure; 5. indications for and principles of first aid. Demonstrate basic first aid in the event of: 1. a cardiac arrest; 2. various injuries; 3. other medical emergencies. Demonstrate the following clinical skills: 1. make a patient's bed; 2. position the patient in the bed, according to their condition; 3. prevent falls and injuries; 4. general hygiene measures; 5. maintain hygiene of the nose, eyes, mouth, ears and perianal region; 6. monitor vital functions- breathing, pulse, blood pressure and body temperature; 7. correctly position ECG leads and defibrillator pads; 8. correctly use a pulse oximeter; 9. correctly use equipment in injured patients; 10. correctly position and prepare injured patients for transport.
Course content broken down in detail by weekly class schedule (syllabus)	The subject has 60 h of teaching, divided into 2 sections: 1. Lectures: 8 h 1.1. Introduction; 1.2. Vital signs; 1.3. Symptoms and signs of multiorgan failure; 1.4. Basic life support in adults; 1.5. Basic life support in babies and children; 1.6. First aid in the event of an injury; 1.7. First aid in the event of an insect bite; 1.8. First aid in the event of poisoning. 2. Practical classes : 52 h 2.1. Vital signs; 2.2. Using first aid equipment, positions for transport; 2.3. BLS + AED/ adults, with case scenarios; 2.4. BLS / Babies and children, with case scenarios; 2.5.First aid in an injured patient; 2.6. Managing multiorgan failure- a case scenario; 2.7. Hospital surroundings and equipment + Hygiene measures; 2.9. Managing various environmental emergencies, snake bite scenario.

Code	MFE113, MFE209	Year of study	1st, 2nd		
Course teacher	Anamaria Sabatini, MA	Credits (ECTS)	0		
Associate teachers		Type of instruction (number of hours)	L	S	E	T
			0	120	0	120
Status of the course	Mandatory	Percentage of application of e-learning	0%		

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Listening: students should understand common phrases in spoken language. Reading: students should be capable reading short sentences and texts. Speaking: students should communicate using short sentences. Writing: students should be able to write simple sentences.
Course content broken down in detail by weekly class schedule (syllabus)	Introductory explanation of grammatical forms, introduction of basic vocabulary (20 hours). Listening, reading, speaking and writing of simple sentences.
Format of instruction	☐ lectures ☒seminars and workshops ☐ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Class attendance		Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay		(Other)	
	Tests		Oral exam		(Other)	
	Written exam		Project		(Other)	

Grading and evaluating student work in class and at the final exam	Written exam. Individual reports.

Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	1. Cvikić, L. i Bošnjak, M. (2012). Hrvatski u malome prstu. Hrvatsko filološko društvo., Zagreb.		
Optional literature (at the time of submission of study programme proposal)			
Quality assurance methods that ensure the acquisition of exit competences	▪ Teaching quality analysis by students and teachers ▪ Exam passing rate analysis ▪ Committee for control of teaching reports ▪ External evaluation		
Other (as the proposer wishes to add)			

NAME OF THE COURSE	**Basic Neuroscience**					
Code	MFE205	Year of study	2nd			
Course teacher	Prof. Maja Valić, MD, PhD	Credits (ECTS)	9

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Name, recognize and describe morphologic characteristics of the central nervous system, midbrain, brainstem, peripheral nervous system, spinal cord and describe their function. Describe basic electrophysiological characteristics of the neuron, explain mechanisms of the generation of transmembrane resting potentials, action potentials and postsynaptic potentials.					

	Describe the principle of the information transmission between neurons, classify and explain characteristics and mechanisms of neurotransmitters' action, describe the structure of the receptors, and discuss their role in the information transmission. Describe, explain and outline principles of sensory system organization and apply adopted knowledge in solving examples of clinical cases. Describe, explain and outline principles of motor system organization and apply adopted knowledge in solving examples of clinical cases. Describe, explain and interpret neurophysiologic characteristics of the general brain function: learning and memory, emotions, sleep and wakefulness, neuronal control of breathing and hearth function. Use acquired theoretical knowledge in solving practical electrophysiological problem tasks on computer. Use acquired theoretical knowledge and demonstrate skills in recording of human bioelectrical potentials (EEG, EMG, and EOG).
Course content broken down in detail by weekly class schedule (syllabus)	Morphology of the central nervous system; cellular and molecular neuroscience; synaptic transmission; sensory systems; motor systems; regulatory systems of the brain; and higher brain functions.
Format of instruction	☒ lectures ☒ seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Class attendance		Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay		(Other)	
	Tests		Oral exam		(Other)	
	Written exam		Project		(Other)	

Grading and evaluating student work in class and at the final exam	In-course tests; Final written examination; Oral exam

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	By the end of the course, a successful student should be able to: Describe: 1. the importance of communication skills; 2. how to take a patient's history; 3. how to conduct a basic clinical examination; 3. how to monitor vital functions; 4. advanced life support in adults, babies and children; 5. a structured approach to injuries; 5. cardiac decompensation; 6. causes and consequences of cardiac and respiratory failure; 7. altered conscious states.					
Course content broken down in detail by weekly class schedule (syllabus)	The subject has 60 h of teaching, divided into 3 parts: 1. Lectures: 8 h 1.1. History taking and communication skills; 1.2. Physical examination; 1.3. Monitoring vital functions; 1.4. Structured approach to complex injuries; 1.5. Cardiorespiratory failure; 1.6. Causes and consequences of acute cardiac and respiratory failure; 1.7. Altered states of consciousness. 2. Demonstrations: 4 h 2.1. Resuscitation of babies and children; 2.2. Resuscitation of adults; 2.3. Managing injured patients;					

<table>
<tr><td></td><td colspan="6">2.4 Use of equipment for managing injured patients and preparation for transport.
3. Practical classes: 48 h
3.1. Communication skills, history taking and clinical examination;
3.2. Advanced life support in babies and children- case scenarios;
3.3. Advanced life support in adults, with case scenarios;
3.4. Managing injured patients, with case scenarios;
3.5. Cardiovascular disease case scenarios;
3.6. Respiratory disease case scenarios;
3.7.Abdominal/pelvic disease case scenarios.</td></tr>

<tr><td>Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</td><td colspan="5">- Explain how innate and adaptive immunity function and integrate their joined functioning in the defense of human organism. Correct usage of immunologic terminology.
- Name immune cells and antibody classes; describe their action mechanism. Explain antibody and T and B cell receptor diversity.
- Describe the most important cytokines and MHC molecules and their main functions. Differentiate main immune disorders
(hypersensitivity, autoimmunity and immunodeficiency), name their subtypes and explain mechanism of their development.
- Critically evaluate blood leukocytes count.
- Distinguish the basic types of vaccines.
- List examples of research techniques used to analyze proteins and immune cells.
- Describe the structure of human genome and 'average' genes. Explain the definitions and learn basic rules of inheritance using basic examples. Learn how to use the genetic terminology. Significance of mutations.
- Explain the autosomal and sex-linked inheritance. Learn to recognize correct inheritance type.
- Understanding the genetic and environmental background of certain monogenic diseases, polygene diseases, chromosomal disorders. Examples.
- Knowledge of the method of prenatal genetic testing; Ethical and legal issues in medical genetics.
- Use of basic genetic techniques in the context of basic genetic discoveries. Basic examples of pharmacogenomics importance. Understanding the connection between cancer genetics and polygenetic phenotypic characteristics.
Learning the importance of modern genetic breakthroughs including gene therapy, genetically modified organisms and stem cell research. Comparison and usage of different gene and protein databases.
During the course, students learn how to communicate, present data and discus about relevant scientific topics, and how to synthesize learned material.</td></tr>
<tr><td>Course content broken down in detail by weekly class schedule (syllabus)</td><td colspan="5">Lectures:
L1(2 hours) – Basic Immunology
L2(2 hours) – Innate Immunity
L3(2 hours) – Cytokines
L4(2 hours) – Chronic inflammation and cancer
L5(2 hours) – Research methods in immunology
L6(2 hours) – Microbiome. Autophagy in immunity
L7(2hours) – Immunotherapy and vaccines
L8(2 hours) – Introduction to Medical genetics. Human genome project</td></tr>
</table>

<table>
<tr><td></td><td colspan="6">L9(2 hours) – RNA genes. RNAi. Mutations and aberrations. Functional genomics & proteomics
L10 (2 hours) – DNA analysis.
L11 (2 hours) – Epigenetics. Telomeres.
L12 (2 hours) – Gene therapy. Genetically modified organisms (GMO)
Seminars:
S1 (3 hours) – Antigen presentation. MHC
S2 (3 hours) – Antigen recognition. Antibodies. Adaptive immunity.
S3 (3 hours) –Cell-mediated immune responses.
S4 (3 hours) – Effector mechanisms in cell-mediated immunity.
S5 (3 hours) – Humoral immune responses.
S6 (3 hours) – Effector mechanisms in humoral immunity responses. Complement.
S7 (3 hours) – Immunological tolerance. Autoimmunity. Tumor immunity.
S8 (3 hours) – Transplantation. Hypersensitivity.
S9 (3 hours) – Congenital and acquired immunodeficiency. Clinical cases.
S10 (3 hours) – Developmental genetics. Mendelian/Non-Mendelian inheritance patterns.
S11 (3 hours) – Hemoglobin and the Hemoglobinopathies.
S12 (3 hours) – Phamacogentics. Single gene disorders.
S13 (3 hours) – Congenital malformations. Chromosome disorders.
S14 (3 hours) – Cancer genetics.
S15 (3 hours) – Genetic factors in common disorders. Prenatal testing.
S16 (3 hours) – Genetic counseling. Screening for genetic disease. Ethical and legal issues.
Practical:
P1 (3 hours) – Leukocytes
P2 (3 hours) – Differential blood count. Blood groups.
P3 (3 hours) – Flow cytometry.
P4 (2 hours) – ELISA.
P5 (3 hours) – ELISA cont. Results analysis.
P6 (2 hours) – Visit to clinical laboratory for medical genetics.
P7 (2 hours) – Primer design for genetic testing.
P8 (2 hours) – Bioinformatics: Database search. DNA sequence analysis. OMIM.
P9 (2 hours) – Scientific article analysis.
P10 (2 hours) – Odds, probabilities. Risk calculation.</td></tr>

Course enrolment requirements and entry competences	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016)					

required for the course	http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1.Describe and explain the basic chemical bonds between the compounds and analyze and calculate the basic physicochemical principles that apply to gases and solutions 2.Describe and explain the structure and reactions of the most important biochemical compounds, including small, large and supramolecular structures that are found in the cell 3. Define and explain the principles of biochemical and energetic changes as well as regulation mechanisms of metabolism of carbohydrates, lipids, proteins, informational macromolecules and signaling molecules 4. Integrate the metabolic changes at the cell, tissue, and whole organism level 5. Develop practical skills for working in the laboratory (the basics of safe practice in the lab, the calculation of basic laboratory parameters and monitoring and interpretation of results of laboratory measurements 6. Critically judge the meaning of biochemistry in modern medical science
Course content broken down in detail by weekly class schedule (syllabus)	Structures and functions of proteins and enzymes. Bioenergetics and the metabolism of carbohydrate and lipids. Metabolism of proteins and amino acids. Structure, function and replication of informational macromolecules. Biochemistry of extracellular and intracellular communication. Special topics (Nutrition, Micronutrients, Free radicals and Antioxidant Nutrients, Hemostasis and Thrombosis, Red and white Blood Cells, Metabolism of Xenobiotic and Biochemical case Histories).
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf	
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Identify, describe and explain the most important characteristics of neuromuscular, cardiovascular, respiratory, kidney, gastrointestinal and endocrine system at the level of the cell, organ and whole body. Describe, discriminate and explain control mechanisms (negative and positive feedback loops) critical for homeostasis. Name and explain changes that occur in each system as a consequence of deviation of parameters within and outside of physiological limits. Critically judge educational materials (textbooks and lectures), participate in argumentative discussions and construct opinions. Apply adopted knowledge to predict function of system in the future. Compare similarities and differences in function between different systems in our body. Use acquired theoretical knowledge for solving practical problems. Perform and practice measurement of selected physiological parameters, and explain collected results. Construct and analyze diagrams showing relations between two or more parameters, predict behavior of the system in changed conditions.	
Course content broken down in detail by weekly class schedule (syllabus)	Lectures (30 hours): 1.Introductory lecture, homeostasis 2.Red blood cells and blood types 3.Biology of the cell 4.Physiology genomics 5.Cell signaling 6.Autonomic nervous system 7.Integration of cardiovascular system 8.Cell bioenergetics 9.Electrophysiology of the heart 10. The Body Fluid Compartments; Edema 11. Integration of respiration 12. Sport physiology 13. Environmental physiology 14. Breath-hold diving 15. Introduction to endocrinology	Number of hours: 2 2 1 2 2 2 3 2 2 2 2 2 2 2 2 2 Number of hours:

	Seminars (94 hours):	
		2
	1.Hemostasis and Blood Coagulation	2
	2.Transport of Substances Through Cell Membrane	3
	3.Membrane Potentials and Action Potentials	2
	4.Contraction of Skeletal Muscle	3
	5.Excitation of Skeletal Muscle; Cardiac Muscle	2
	6.Excitation and Contraction of Smooth Muscle	2
	7.Rhythmical Excitation of the Heart	3
	8.The Electrocardiogram	3
	9.The Heart as a Pump and Function of the Valves	2
	10.Overview of the Circulation; Vascular Dispensability	3
	11.The Microcirculation; Control of Blood Flow	3
	12.Nervous and Kidneys Regulation of Circulation	3
	13.Control of Cardiac Output	2
	14.Integral control of cardiovascular system	3
	15.Urine Formation by the Kidneys 1	3
	16.Urine Formation by the Kidneys 2	3
	17.Regulation of Extracellular Fluid Osmolality	3
	18.Renal Regulation of Ions;	2
	19.Acid-Base Regulation	2
	20.Integration seminar 1	3
	21.Structure and Function of the Respiratory System 1	
	22.Structure and Function of the Respiratory System 2	3
	23.Pulmonary Circulation, Edema and Fluid	2
	24.Physical Principles of Gas Exchange; Transport of O2, CO2	3
	25.Regulation of Respiration	2
	26.Clinical seminar	2
	27.General principles of Gastrointestinal Function	2
	28.Secretion; Digestion and Absorption; Liver as an Organ	3
	29.Dietary Balances; Body Temperature Regulation	3
	30.Energetics; Pituitary Hormones and Hypothalamus	2
	31.Thyroid Hormones, Energetics	3
	32.Adrenocortical Hormones	2
	33.Insulin, Glucagon, and Diabetes Mellitus	2
	34.Parathyroid Hormone, Calcitonin, Ca and P Metabolism	2
	35.Reproductive and Hormonal Functions of the Male	2

	Exercises (56 hours): 1.Red Blood Cells 2.Arterial Blood Pressure and Exercise 3.EKG and Heart Ultrasound 4.Simulation of Cardiovascular System 5.Heart Response to Simulated Breath-Hold Diving 6.Central Regulation of Breathing 7.Spirometry 8.Spiroergometry 9. OGTT 10.Human exercise	 6 5 5 5 6 6 6 6 6 5

Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work	☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.	

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Class attendance		Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay		(Other)	
	Tests		Oral exam		(Other)	
	Written exam		Project		(Other)	

Grading and evaluating student work in class and at the final exam	In order to take the exam in physiology students have to be present in classes. Exam in physiology consists of both written (test) and oral exam. Written exam consists of 150 questions divided into 2 separate tests. Student is allowed to take oral exam after he/she achieves 90 points on both tests (at least 45 points on each individual test).

Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	1. A. C. Guyton and J. E. Hall, Textbook of Medical Physiology, 13th ed., Saunders Elsevier, Philadelphia, 2015.

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- Determine and interpret pathophysiological disorders characteristic for the individual functional units, as well as for the whole organism - Explain and critically interpret functional tests in the evaluation of various pathological conditions - Explain and discuss the changes that occur in disorders of control mechanisms (both positive and negative feedback) of individual organ systems, as well as the entire organism - Enumerate, describe and explain the clinical features associated with specific pathophysiological processes in various pathological conditions - Explain the impact of inheritance, environmental factors and risk factors in the etiopathogenesis of various pathological conditions
Course content broken down in detail by weekly class schedule (syllabus)	Throughout this subject-matter students will get acquainted with basic pathophysiological processes in different pathological conditions. Teaching is organized as a cluster of problem oriented seminars, experimental and clinical exercises throughout which students are encouraged to acquire knowledge and skills necessary for understanding of pathophysiology. Pathophysiology of homeostasis, general principles of the disease, and special pathophysiology of organic systems including integrations on the level of the whole body as the organic, psychological, and social human being.
Format of instruction	- Lectures - Seminars - Practice
Student responsibilities	In accordance with the Rules of the study and the study system and Deontological code for students of Medical school in Split.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Attendance	0,5	Research		Practical training

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Describe and explain the general principles of drugs actions (pharmacodynamics) and fate of drugs in organism (pharmacokinetics). 2. List and name the most important drugs that represent individual pharmacotherapeutic class and group them according to the mechanism of action. 3. Describe and explain drug administration routes, main indications, contraindications and side effects of the drugs that are illustrative example of certain pharmacotherapeutic groups and subgroups. 4. Review significant drug interactions and relate them with the drugs pharmacokinetic and pharmacodynamic properties. 5. Explain and describe process of new drugs development and testing. 6. Calculate the doses and properly write prescriptions for different pharmaceutical formulations of drugs. 7. Utilize relevant national and international drug databases.					
Course content broken down in detail by weekly class schedule (syllabus)	LECTURES: 1. Introduction, drug absorption and distribution 2. Drug metabolism and elimination 3. Mechanisms of drug action 4. Pharmacology of autonomic nervous system 5. Antihypertensive agents 6. Drugs used in angina pectoris and heart failure					

<table>
<tr><td></td><td colspan="6">7. Drugs used in cardiac arrhythmias
8. Antipsychotics and antidepressants
9. Drugs in the treatment of pain
10. Anticoagulants, inhibitors of platelet aggregation and fibrinolytic agents
11. Adrenocorticosteroids and adrenocortical antagonists
12. Antimicrobial drugs
SEMINARS:
1. Pharmacokinetics
2. Pharmacodynamics and side effects
3. New drugs development, generic drugs and pharmacogenomics
4. Cholinergic drugs
5. Adrenergic drugs
6. Diuretics
7. Antihypertensives
8. Agents used in dyslipidemia
9. Antiseazure drugs and agents used in neurodegenerative diseases
10. Local and general anesthetics
11. Sedative-hypnotic drugs
12. Opioid analgesics and drugs of abuse
13. Pharmacology of histamine, serotonin and the ergot alkaloids
14. Nonsteroidal antiinflammatory agents, disease modifying antirheumatic drugs
15. Agents used in anemias and hematopoetic growth factors
16. The gonadal hormones and inhibitors
17. Pituitary hormones, thyroid and antityroid drugs, agents that affect bone mineral homeostasis
18. Pancreatic hormones and antidiabetic drugs
19. Immunopharmacology
20. Drugs used in the treatment of gastrointestinal diseases
21. Drugs used in asthma
22. Cancer chemotherapy
23. Main antimicrobials
24. Antiviral agents and antimycobacterial drugs
25. Antifungal and antihelminthic drugs
PRACTICE:
V1. Pharmacokinetics & Pharmacodynamics
V2. Drugs &Autonomic nervous system: cardiovascular and the neromuscular junction effects
V3. Drug effects in the isolated heart
V4. The isolated rings of rat aota and ilum: mechanisms of drugs action
V5. Drugs affecting gastrointestinal function
V6. Psychopharmaceuticals & Analgetics
V7. The potential of the internet in searching for up to date drug information
V8. Fg1. Introduction, magistral preparations 1
V9. Fg2. Magistral preparations 2
V10. Fg3. Galenic preparations and original drugs
V11. Fg4. Repetition and pediatric doses</td></tr>

Grading and evaluating student work in class and at the final exam	Requirements for taking the final exam are orderly attendance to all teaching activities during the course of Pharmacology and completed practical test in drugs prescribing. The exam is composed of the written test and oral exam that equally contribute to the final mark. Successful completion of the written test is prerequisite for the oral exam. Written exam contains 110 questions divided into 9 groups covering all areas of Pharmacology. All questions are multiple choices with one correct answer out of five. Students have 120 minutes for completing the test. Minimum of 69 correct answers/ points are required for passing.

<tr><td>Learning outcomes expected at the level of the course (4 to 10 learning outcomes)</td><td colspan="5">Students will acquire knowledge and skills in evidence-based medicine, assessment of quality in health care, research methodology relevant for medical practice, use of medical information, and use of statistical methods in medicine. This will develop students' competencies for critical assessment of their work and decision making in medicine, research and use of sources of evidence.
Specific competencies include:
a) identifying and understanding sources of knowledge and paths of communicating new knowledge in medicine and health care,
b) understanding of different types of study design,
) critical assessment of evidence and research data,
d) understanding and use of basic statistical terms, definitions and methods,
e) understanding evidence based medicine principles, and
g) responsible conduct of research and research integrity.</td></tr>
<tr><td>Course content broken down in detail by weekly class schedule (syllabus)</td><td colspan="5">The course integrates topics from the following fields: 1. medical informatics, 2. medical statistics, 3. principles of research, 4. principles of evidence based medicine, and 5. principles of assessing quality of health care. For each of the 5 areas, integrated into logical units, the teaching includes 2 h lectures, 3h seminars organized as team learning and 5 h practical work organized as problem-base learning (a total of direct student teaching: 10 h lectures, 15 h seminars and 25 h practical labs).</td></tr>

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*	Class attendance		Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay		(Other)	
	Tests		Oral exam		(Other)	
	Written exam		Project		(Other)	

Grading and evaluating student work in class and at the final exam	The course exam has three components: continual formal written evaluation of 1) knowledge and 2) skills and 3) an integrated written test at the end of the course. All course assignments are graded, and the final score ranges from 0 to 100% so that 60% of the score comes from the evaluations during the course and 40% from the final written test. Grades are awarded according to the following criteria: 0-55 - fail, 56-65 - satisfactory, 66-75 - good, 76-85 - very good, ≥86 - outstanding.

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	By the end of this course the students will be able to: 1. Select the diagnostic tests for making etiological diagnosis of infective diseases, 2.Use the correct method of collection, storage and transport of various clinical specimens for microbiological testing, 3.Identify the common infectious agents with the use of basic laboratory methods, 4.Interpret the microbiology laboratory reports for the diagnosis of infectious diseases, 5. Use of sensitivity tests to select suitable antimicrobial agents, 6. State the suitable antimicrobial agents for treatment of infectious diseases, 7. Apply the methods for the prevention and control of infections.
Course content broken down in detail by weekly class schedule (syllabus)	Diagnostic methods for making etiological diagnosis of bacterial, fungal, viral and parasitic infections of humans. Interpretation of microbiological results.

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	After passing the course, the students will have the knowledge base, skills and attitudes that will enable them to describe the basic radiological procedures, to analyze the images, providing elementary differential diagnosis. 1. Explain the principle of x-ray, ultrasound, and magnetic resonance imaging (MRI); 2. Describe conventional equipment used in radiology; 3. Explain the biological effects of x-rays as well as radiation protection procedures; 4. Define the basic modalities and procedures in radiology, as well as their utilization in clinical practice; 5. Choose and apply imaging studies according to the clinical status /diagnosis of the patient; 6. List the contrast agents and describe their possible side effects; 7. Identify the basic anatomical structures and abnormal findings on radiological images; 8. Define various procedures performed in interventional radiology.
Course content broken down in detail by weekly class schedule (syllabus)	General radiology: Origins and characteristics of x-rays and ultrasound; the phenomenon of electro-magnetism and radio frequency wave, construction of the imaging equipment – conventional and digital; basic operating principles of x-ray unit and imaging systems, along with the most recent technological advance including "film-less" radiology, radiological/hospital information systems and digital image archiving system (PACS); basics of the biological effects of ionizing and non-ionizing radiation; radiation patients and staff (including appropriate indication, optimal algorithm of the radiological procedures, “cost benefit” analysis, and preferential use of modalities without ionizing radiation). Clinical radiology: Radiological imaging modalities and their clinical applications; radiological anatomy and morphology of pathological changes affecting organs and organ systems; indications for imaging studies and patient preparation instruction for these radiological procedures; contraindications, adverse reactions and possible complications. Radiological imaging algorithms for various pathological conditions, taking into account the diagnostic reliability of individual studies and patient radiation doses; imaging-guided biopsies and most important vascular as well as non-vascular interventional radiology procedures
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split.					

	(FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Students will develop knowledge of clinical examination of a neurosurgical patient, of diagnostic and therapeutic procedures to treat patients with injuries and/or diseases of central and/or peripheral nervous system, of the degree to which a neurosurgery is urgent, types of neurosurgeries, their successfulness or possible complications.
Course content broken down in detail by weekly class schedule (syllabus)	Introduction to neurosurgery; History of neurosurgery; Diagnostic procedures in neurosurgery (history taking, clinical neurological examination, EMG, EEG, CT, MRI, LM); Principles of neurosurgical treatment (trepanation, craniotomy, pain treatment; Space-compressive intracranial processes-pathophysiology of intracranial space (ICP, different types of impaction and signs); Intracranial tumors-neurooncology; Hydrocephalus in children and adults – circulation of CS fluid; Differential diagnosis of neurosurgical diseases; Children neurosurgery; Cerebrovascular surgery; Craniocerebral injuries-neurotraumatology; Intracranial hematoma; Concussion-contusion-pressing of the brain; Glasgow coma scale score (GCS score). Diseases and injuries of the spine and spinal cord. Discoradicular conflict C 5, 6, 7, 8/ L2, 3, 4, 5, S1. Prognosis and rehabilitation of neurosurgical patients.
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Describe and explain general principles of anesthetic action + harmacodynamics and pharmacokinetics. 2. List the most important drugs in anesthesia and group them according to mechanism of action. 3. Name and explain the routes of administration, indications and contraindications, as well as side-effects of various drugs 4. Calculations of drugs dosage 5. Identify, describe and explain the most important characteristics of neuromuscular, cardiovascular, respiratory, kidney, gastrointestinal and endocrine system. 6. Describe, differentiate and explain control mechanisms (negative and positive feedback loops) critical for homeostasis of the human body during anesthesia procedures and intensive treatment. Describe, differentiate and explain conducting of anesthesia procedures. Especially perform differentiation between regional and general anesthesia. 7. Describe, differentiate and explain management of treatment procedures in Intensive care units. Especially differentiate and explain characteristics of treatment					

	of various organ failures. 8. Describe, differentiate and explain conducting of procedures for various painful situations, especially differentiate treatment of acute and chronic pain. 9. Describe, differentiate and explain procedures of vital signs monitoring. Basic and advanced monitoring. Describe, differentiate and explain procedures of basic and advanced life support 10. A student should acquire the theoretical and practical knowledge of BLS/ ALS, theoretical knowledge of clinical findings, monitoring and treatment of victims of intoxication, patients with multiple trauma, multiorgan failures and life threatening infections as well as of emergencies due to physical agents. S/he will also develop the theoretical knowledge of anesthesia procedures including types and choice of anesthesia, basic pharmacology of agents used in anesthesia, therapy of pain, reanimatology and intensive care.
Course content broken down in detail by weekly class schedule (syllabus)	L = lecture, S = seminars, E = exercises L1. Introduction to Anaesthesiology. The History of Anaesthesia L2. Preparing Patients for Anaesthesia L3. Approach to Life-threatened Patients. Basics of CPR. L4. Shock L5. A Structured Approach to a Seriously Injured Person L6. Local and Regional Anaesthesia L7. Pain – Prevention and Therapy L8. Anaphylaxis. Anaphylactic Shock. L9. Respiratory Failure. Respiratory Support L10. Poisoning L11. Pulmonary Embolism L12. Enteral and Parenteral Nutrition Seminars are divided into 10 major units, within which there are several topics that students are dealing with. The seminars are designed so that the student processes particular subject area, usually in the form of PowerPoint presentations. The teacher (mentor) evaluates student presentation (grades 1-5). Afterwards the teacher encourages the discussion in which everyone is allowed to participate. Seminar topics: S1. Fluid Therapy and Venous Access (central, peripheral) S2. Hemodynamic & Vasoactive drugs. S3. Local Anaesthetics S4. Chronic pain S5. Cardiopulmonary reanimation S5. Non-invasive Monitoring of Vital Parameters S7. Emergencies caused by Environmental Factors S8. Acute Coronary Syndrome S9. Burns. S10. Oxygen Therapy Exercises with the expected events that a student must attend or, if necessary, with assistance to apply. Exercises take place in 13 different working sites. There are usually 4-5 students in each exercise group. E1. Surgical Emergency Department, Firule - methods of emergency care, the importance of a structured approach to a life-threatening patient, the importance of establishing iv route, devices and drugs in emergencies, transport of an emergent patient E2. ICU– Firule, ground floor - in general about ICU (space, equipment and personnel, admittance indications), mechanical ventilation, monitors and other equipment, specificity of ICU therapy (enteral, parenteral nutrition, organ function support, invasive monitoring). E3. Cardiac ICU – Firule, ground floor – as for E2 + cardiac surgery patient + knowledge of basic vasoactive drugs E4. ICU Krizine and operating block Krizine – as during E2 + specificity of anaesthesia in orthopaedic, urological and plastic surgery, burns - intensive treatment

	E5. Pain Clinic, Krizine, 1st floor – examination and various therapeutic methods E6. Operating block, Firule, 2nd floor - Anaesthesia for General and Thoracic Surgery (Rooms 2&3) – techniques of one-lung ventilation, anaesthesia for abdominal surgery, postoperative analgesia E7. Operating block, Firule, 2nd floor, Anaesthesia for Vascular Surgery &Traumatology (Rooms 4&5) - anaesthesia for aortic surgery, anaesthesia for carotid endarterectomy, regional anaesthesia for traumatology patients E8. Gynaecology/Obstetrics, Firule, New Building - specificity of obstetric anaesthesia, anaesthesia for caesarean section, painless birth E9. ENT Clinics, Firule, 2nd floor - specificity of ENT anaesthesia, anaesthesia for tonsillectomy, difficulty airway E10. Anaesthesia for Cardiac Surgery (Room 1) and Neurosurgery (Room 7), Firule, operating block – anaesthesia for neurosurgery and cardiac surgery, vasoactive drugs, invasive monitoring E11. Paediatric Anaesthesia, Firule, operating block (Room 6) - specificity of anaesthesia in children, inhalation induction of anaesthesia, equipment, devices and drugs for paediatric anaesthesia CLINICAL SKILLS – REPETITORIUM (PATHOLOGY-ANATOMY BUILDING, Firule, basement) E12. Airway – intubation, equipment + Infusions, venous access, infusion therapy E13. BLS, AED, ALS
Format of instruction	☒ lectures ☒ seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
Class attendance		Research		Practical training		
Experimental work		Report		(Other)		
Essay		Seminar essay		(Other)		
Tests		Oral exam		(Other)		
Written exam		Project		(Other)		

Grading and evaluating student work in class and at the final exam	Each student must hold a seminar. Any absence from seminars must be additionally passed (colloquium) at the respective teachers. Without it, the student is not allowed to approach the final exam! The exam is written and oral divided into sections from anesthesiology, reanimatology and intensive care The student must respond to minimum 60% of questions from a written exam, to get to the oral part. At least one question from reanimation is required during an oral exam.

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Indicate, describe and explain the biology, etiology and epidemiology of malignant tumors. 2. Explain and classify malignant tumors according sites and stages. 3. Recognize the symptoms of a malignant tumor and conduct optimal assessment. 4. Describe, analyze, relate, choose, distinguish and discuss the forms of specific oncological treatment and to compare the similarities and differences between certain forms of specific oncological treatment (cytostatic therapy, radiation therapy, hormonal therapy, immunotherapy, other forms of therapy [gene therapy, photodynamic therapy, hyperthermia, anti-angio genesis therapy, anti-metastatic therapy]). 5. To design, plan and give an example of the best treatment options for oncological patient and critical choose and prepare a solution of optimal treatment of oncological patients. 6. Enumerate and discuss the adverse events of a specific oncological treatment. 7. Plan optimal follow up of oncological patient and recognize early signs of recurrence.

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Describe and explain the etiology and clinical signs for: tumors of the oral cavity, paranasal cavities and salivary glands, head and neck malformations and deformities, inflammatory diseases and cysts of jaws and head soft tissues, temporomandibular joint disorders. Describe and distinguish signs of different facial bone and soft tissue injuries. 2. Name the most important diagnostic methods and list general diagnostic results in the diagnostics of facial bone and soft tissue injuries, tumors of the oral cavity, paranasal cavities and salivary glands, head and neck malformations and deformities, inflammatory diseases and cysts of jaws and head soft tissues, temporomandibular joint disorders. 3. Indicate and generally explain the treatment choices for facial bone and soft tissue injuries, tumors of the oral cavity, paranasal cavities and salivary glands, head and neck malformations and deformities, inflammatory diseases and cysts of jaws and head soft tissues, temporomandibular joint disorders. 4. Perform the detailed clinical examination of the face, oral cavity and neck. Practice the assessment of the dental occlusion and masticatory function. Perform the initial treatment of facial soft tissue injuries. Estimate the urgency and course of action in the treatment of facial bone injuries.					
Course content broken down in detail by weekly class schedule (syllabus)	Introduction to maxillofacial surgery with a brief overview of dentistry since teeth are an integral part of the jaw. Students will be introduced to facial deformities and malformations and orthognathic surgery (in cooperation with an orthodontist). Introduction to facial traumas and modern surgical techniques in the treatment of fractures. Students will master a detailed examination of the face and neck, and be able to spot anomalies by inspection and palpation. Students will learn to verify tumor formations of the head and neck, oral cavity, paranasal sinuses and salivary glands. Learning to recognize cystic formation of the mouth, and odontogenic and

COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split.					

	(FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Students should acquire basic understanding of orthopedic diseases, etiology, clinical symptoms, diagnostics and treatment of orthopedic patients. They should also develop basic skills in diagnostic and therapeutic procedures. They will be trained in rehabilitation and resocialization of patients with diseases and injuries and/or damages in the function of the musculoskeletal system within the primary health care system. They should also be able to take appropriate measures in the community as to prevent development of disease and injuries of the musculoskeletal system.
Course content broken down in detail by weekly class schedule (syllabus)	Congenital and developmental diseases of the locomotor system, inflammatory and degenerative diseases, circulatory diseases, tumors, injuries, amputations and prosthetics, aloarthroplastics of the joints. Orthopedics classes enable students to master the knowledge and skills for dealing with orthopedic problems in the work of primary care physicians. Classes include general knowledge from basic medical subjects and specific knowledge of the functional anatomy of the locomotor system. Furthermore, they include the acquired knowledge from clinical subjects, particularly from internal medicine with an emphasis on clinical immunology with rheumatology, followed by neurology and partly pediatrics including clinical genetics.
Format of instruction	☒ lectures ☒seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	The student should be able to make a diagnosis independently and to treat or begin treatment of patients with the ENT problems or diseases. Identify ear, throat and nose deformations. Identify and describe effusion from the ear. Identify and recognize vertigo and hearing loss. Identify bleeding from the nose and nasal obstructions. Identify inflammatory conditions of the ear, nose and throat. Identify hoarseness and dysphagia. Also identify and describe pathological conditions of the salivary glands, thyroid gland and parathyroid glands. Discuss about treatment options for certain conditions. Critically judge educational materials, participate in argumentative discussions and construct opinions. Use acquired theoretical knowledge for solving practical problems.					
Course content broken down in detail by weekly class schedule (syllabus)	Diseases of ear (otalgia, ear channel itching, ear discharge, anomalies of the concha auricular, deafness/hearing loss, tinnitus, dizziness), nose diseases (nose bleeding, nose deformity, nose obstruction and discharge, sneezing, snoring, decreased/lost sense of smell), oropharyngeal diseases (jaw crunching, neck swelling and pain, anomalies of the oral cavity and tongue, hyper salivation, tonsillar problem, dry mouth, taste disorder, fetor ex ore), laryngeal diseases (hoarseness,					

	swallowing problems, differential diagnosis of «pharyngeal globus»), oncology of ENT region, plastic reconstructive surgery of ENT region, disease of salivary glands, thyroid gland and parathyroid glands.

Code	MFE606		6th			
Course teacher	Assist. Prof. Joško Božić, MD, PhD	Credits (ECTS)	6			
Associate teachers			L	S	E	T

		Type of instruction (number of hours)	0	0	120	120
Status of the course	Mandatory	Percentage of application of e-learning	0%			

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Identify and name the basic determinants of scientific research methodology and writing a science paper 2. Set a science research hypothesis independently 3. Independently choose and argue the adequate methodological approach to establish, formulate and critically evaluate own research 4. Recognize the basic ethic principles of scientific research and writing scientific papers 5. Critically choose and use relevant literature 6. Verbally present own scientific research results
Course content broken down in detail by weekly class schedule (syllabus)	Course contents include students' independent work with mentor supervision (100 hours). Immediate teaching consisting of 20 hours of exercises is dedicated to making and grading the final form of thesis.
Format of instruction	☐ lectures ☐seminars and workshops ☒ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Class attendance		Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay		(Other)	
	Tests		Oral exam		(Other)	
	Written exam		Project		(Other)	

Grading and evaluating student work in class and at the final exam	The quality of graduation thesis and public thesis defense is graded. Graduation thesis quality is graded with 0-50 points, and graded with 0-50 points.Grades: sufficient 56-65 points, good 66-75 points, very good 76-85 points and excellent 86 and more points.

	Title	Number of copies in the library	Availability via other media
Required literature (available in the library and via other media)	1. Day RA, Gastel N. How to write and publish a scientific paper. 7 ed. Cambridge (UK): Cambridge Univerisity Press;2012.		
Optional literature (at the time of submission of study programme proposal)			
Quality assurance methods that ensure the acquisition of exit competences	▪ Teaching quality analysis by students and teachers ▪ Exam passing rate analysis ▪ Committee for control of teaching reports ▪ External evaluation

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1.Perform consultation in family practice setting 2.Solving clinical problems of a broad spectrum and type in family practice 3.Perform patient centered care 4.Apply problem solving skills in family practice conditions (example: early and weak differenced conditions, small and self-solving diseases, using time as diagnostic tool, prevention of overmedication) 5.Apply evidence based approach as standard procedure in practical problem solving 6. Perform clinical skills procedures
Course content broken down in detail by weekly class schedule (syllabus)	Characteristics of FM, tasks and scope of activities, organization, financing, functioning of FM in Europe. Medical problems in FM. Medical documentation. Cooperation with consultants, patient referral to specialists. Clinical procedures. Drug treatment. Communication. Family and health. House call. Domiciliary treatment. Specific health care for patients in family practices. Legal outlines of FM. Doctor's office. Equipment. Physician's bag. Organization of medical activities, patient admission. Teamwork. Management of practice as a business unit. Appraisal of job performance. Health-related, educational and preventive measures as integral part of FM. Decision making process, clinical judgment. Rational therapy.

Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Describe, explain, integrate and present the major goal of laboratory medicine which provides information to physicians in prevent, diagnose, treat and manage disease. 2. Describe and explain general information concerning test methods and related patient care. 3. Recognize and distinguish, types of biological and analytical variations. 4. Evaluate clinical reliability, or medical usefulness, different results of laboratory tests taking into account the sensitivity and specificity of the laboratory method consistently Evidence Based Laboratory Medicine. 5. Critically judge the information of different laboratory tests results for specific disease associated with other diagnostic methods.
Course content broken down in detail by weekly class schedule (syllabus)	Human biochemistry and physiology, specific biochemical alteration and laboratory tests. Principles of analysis and techniques used in clinical biochemistry laboratory. Understand the roles (screening, diagnosis, monitoring) and limitations for laboratory testing in clinical practice for the following: Physiology and disorders of water, electrolyte and acid-base metabolism; kidney and urinary tract diseases, cardiovascular diseases, hepatobiliary diseases, gastro-intestinal and exocrine pancreatic disease, endocrine disorders, lipid and lipoprotein disorders, biochemistry of calcium, phosphorus and vitamin D metabolism, genetic diseases, immune system disorders. Hematology/coagulation: Principles of blood homeostasis and morphology and function of cellular elements of blood. Recommended laboratory tests for diagnosis and management of hematologic diseases and disordered hemostasis with biochemical implications. Therapeutic drug monitoring.

Ana Marija Dželalija, PhD, MPharm Diana Jurić, PhD, MPharm Marko Grahovac, MD Marin Mornar, MD	Type of instruction (number of hours)	L 10	S 20	P 30	T 0
Status of the course	Mandatory	Percentage of application of e-learning	0 %			
COURSE DESCRIPTION						
Course objectives	After passing the quiz, the student has practical knowledge of indications, contraindications, and guidelines for the rational use of drugs and knowledge of the principles of pharmacodynamics and pharmacokinetics of drugs applied in special groups of patients. The student has practical knowledge of side effects and drug interactions and is able to recognize unnecessary drug use. The student is also trained in the correct calculation of doses and writing prescriptions for various forms of drugs and the use of quality sources of pharmacological literature.					
Course enrolment requirements and entry competences required for the course	Based on the Decision on Requirements for course enrolment and entry competencies (taking courses and exams) of Study Programs of the Integrated Undergraduate and Graduate University Studies at the School of Medicine in Split. (FC 20 Oct 2016) http://neuron.mefst.hr/docs/dokumenti/nastava/Odluka_uvjetima_za_upis_predmeta_ulazne_kompetencije_FV_20-10-2016.pdf					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Describe and explain the general principles of drugs actions (pharmacodynamics) and fate of drugs in organism (pharmacokinetics) in special populations. 2. List and explain the most important guidelines for certain pharmacotherapeutic classes in the rational pharmacotherapy. 3. Describe and explain side effects of the drugs that are illustrative example of certain pharmacotherapeutic groups and subgroups. 4. Review significant drug interactions and relate them with the drugs pharmacokinetic and pharmacodynamic properties.					

	5. Describe the most clinically significant drug poisonings and treatment of poisoned patients. 6. Calculate the drug dose in rational drugs dosage regimen. 7. Properly write prescriptions for finished, magistral and galenic medicines using e-prescribing concept. 8. Utilize relevant national and international drug databases. 9. Develop skills and attitudes needed to recognize and avoid incorrect prescribing.
Course content broken down in detail by weekly class schedule (syllabus)	Practice: 1. Guidelines and case reports from clinical practice: rational antimicrobials use 2. Guidelines and case reports from clinical practice: rational prescribing medicines in hypertension, hypertensive crisis, dyslipidemia, anticoagulants and antiarrhythmics 3. Guidelines and case reports from clinical practice: rational pharmacotherapy of the most common conditions in the family doctor's office 4. Electronic prescribing 5. Guidelines and case reports from clinical practice: rational pharmacotherapy of diabetes 6. Guidelines and case reports from clinical practice: rational pharmacotherapy of pain 7. Guidelines and case reports from clinical practice: venous access and rational intravenous pharmacological therapy 8. Guidelines and case reports from clinical practice: rational pharmacological therapy in emergency medicine 9. Case reports from clinical practice: Using databases (HALMED, Drugs.com, Mediately, Medscape, Toxnet, EudraVigilance, VigiAccess) with verified drug information 10. Case reports from clinical practice: rational pharmacotherapy in special populations: pregnancy, lactation, elderly, children 11. Case reports from clinical practice: rational pharmacotherapy in patients with impaired renal and hepatic function 12. Case reports from clinical practice: acute poisoning and rational antidote therapy

NAME OF THE COURSE	**Basic principles of cardiac electrophysiology and bioenergetics**					
Code	MFMI72	Year of study	2-6.			
Course teacher	Prof. Marko Ljubković, MD, PhD Prof. Jasna Marinović, MD, PhD	Credits (ECTS)	2			
Associate teachers		Type of instruction (number of hours)	L	S	E	T
			10	10	5	
Status of the course	Elective	Percentage of application of e-learning				
COURSE DESCRIPTION						
Course objectives	During the course, special emphasis will be given to learning about the nature of cardiac sarcolemma ion channels; their molecular structure, gating and importance for the cardiac muscle function. Additionally, their contribution to development of various pathological states will be addressed. Students will also become acquainted with biochemical principles of mitochondrial function, their importance for the cellular supply with ATP and the role in other biological processes that are part of either normal of impaired physiological function. Lastly, some aspects of cardiac adaptation will be covered (e.g. adaptation to exercise).					
Course enrolment requirements and entry competences required for the course	Previously taken course in Medical Physiology on the second year of the program.					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	This elective is designed for the students motivated to learn more about electrophysiological principles of cardiac myocytes' function, as well as the mechanisms of production and utilization of energy rich molecules in the cardiac muscle. Students will acquire basic knowledge about the importance of ion channels in the myocardial function and about their role in various pathological states, relevant for the clinical routine. The course will also provide insight into the role of mitochondria in cardiac health and disease and students will learn about various therapeutic strategies based on the mitochondrial function.					
Course content broken down in detail by weekly class schedule (syllabus)	**Day 1.** Lectures (5 hours): Basic principles of cardiac action potential generation and propagation. Cardiac arrhythmias. Channelopathies. Cardiac protection by modulation of sarcolemma ion channels. **Day 2.** Lectures (5 hours): Basic principles of cardiac bioenergetics – the role of mitochondria. Mitochondrial ion channels. Mitochondrial changes in cardiac disease. **Day 3.** Lectures (5 hours): Cardiac					

	adaptation to exercise: the good and the bad. **Day 4.** Practical (5 hours): Laboratory tools for investigation of cellular and mitochondrial function in the heart. **Day 5.** Seminar (5 hours): Discussion of the assigned scientific papers.

NAME OF THE COURSE	**Case studies in pathophysiology**					
Code	MFMI182	**Year of study**	3,4,5,6			
Course teacher	Assist. Prof. Joško Božić, MD, PhD	Credits (ECTS)	2			
Associate teachers			L	S	P	F

	Assoc. Prof. Tina Tičinović Kurir, MD, PhD Assist. Prof. Vedran Kovačić, MD, PhD Marino Vilović, MD	Type of instruction (number of hours)	10	5	10	25
Status of the course	Elective	Percentage of application of e-learning	0 %			

COURSE DESCRIPTION	
Course objectives	Expansion and integration of knowledge about pathophysiological processes in background of frequent medical disorders, as well as the application of critical thinking on clinical cases from practice.
Course enrolment requirements and entry competences required for the course	None
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- interpret and explain pathophysiological processes in the background of frequent disorders of cardiovascular, hematological, gastrointestinal, renal and endocrine systems - describe and explain the main clinical features, symptoms and signs that arise from the pathophysiological basis of certain disorders - enumerate and critically interpret diagnostic tests that can be used in finding the right diagnosis of complex clinical cases - acquire knowledge on optimal therapeutic options in the treatment of complex clinical disorders
Course content broken down in detail by weekly class schedule (syllabus)	- Case studies in cardiology - Case studies in gastroenterology - Case studies in nephrology - Case studies in endocrinology - Case studies in hematology - Case studies in intensive care unit - Case studies of fluid and electrolyte disorders - Case studies of acid-base disorders - Presentation of complex clinical cases of multiple etiology
Format of instruction	- Lectures - Seminars - Practice
Student responsibilities	In accordance with the Rules of the study and the study system and Deontological code for students of Medical school in Split.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Attendance	0,5				
	Seminar paper	0,5				
	Written exam	1,0				

Grading and evaluating student work in class and at the final exam	Written exam		
Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	1.Kasper DL et al. Harrison's principles of internal medicine, 19th edition. McGraw Hill Education, 2015.		
Optional literature (at the time of submission of study programme proposal)	1.McCance KL, Huether SE. Pathophysiology-the biologic basis for disease in adults and children, 7th edition. Elsevier, 2014.		
Quality assurance methods that ensure the acquisition of exit competences	• Quality control analysis by the students and teachers • Analysis exam passing • Report of the Committee for the teaching quality control • Extrainstitutional evaluation (teams for quality control of the National Agency for quality control, inclusion to TEEP)		
Other (as the proposer wishes to add)			

NAME OF THE COURSE	**CLINICAL CASES IN NEUROANATOMY**					
Code	MFMI129	Year of study	2-6			
Course teacher	Assist. Prof. Ivana Pavlinac Dodig, MD, PhD	Credits (ECTS)	2			
Associate teachers	Prof. Renata Pecotić, MD, PhD	Type of instruction (number of hours)	L	S	E	T
			4	11	10	
Status of the course	Elective	Percentage of application of e-learning				
COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Anatomy					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Name, recognize, explain and discuss the functions of CNS main structures. Use acquired theoretical knowledge in neuroanatomy to recognize, identify and interpret clinical signs and symptoms in various CNS lesions. Independently evaluate the precise site of CNS lesion based on the clinical symptoms. Critically judge educational materials, participate in argumentative discussion and construct opinions.					
Course content broken down in detail by weekly class schedule (syllabus)	LECTURES (4 hours) 1. Introductory lecture (2 hours) 2. Review of the CNS structures (2 hours)					

	SEMINARS (11 hours) 1. Blood supply of the CNS (2 hours) 2. Vascular lesions of the CNS (2 hours) 3. Injuries and tumors of the CNS (3 hours) 4. Degenerative disorders of the CNS (2 hours) 5. Hereditary disorders of the CNS (2 hours) EXERCISES (10 hours) 1. Vascular lesions – clinical cases (2 hours) 2. Injuries and tumors – clinical cases (2 hours) 3. Degenerative disorders – clinical cases (2 hours) 4. Students' presentations and final exam (4 hours)

Format of instruction	x lectures x seminars and workshops x exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work	☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

Grading and evaluating student work in class and at the final exam	yes		
Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	Hal Blumenfeld: Neuroanatomy through Clinical Cases, 2nd Edition		yes
Optional literature (at the time of submission of study programme proposal)	• Allan Siegel and Hreday N. Sapru: Essential Neuroscience, 2nd Edition • Duane E. Haines: Neuroanatomy in clinical context, 9th Edition		
Quality assurance methods that ensure the acquisition of exit competences	▪ Teaching quality analysis by students and teachers ▪ Exam passing rate analysis ▪ Committee for control of teaching reports ▪ External evaluation		
Other (as the proposer wishes to add)			

NAME OF THE COURSE	**Communication Skills for Medicine I**		
Code	MFMI183	Year of study	3, 4, 5, 6

Course teacher	Assist. Prof. Varja Đogaš, MD, PhD	Credits (ECTS)	2			
Associate teachers	Assist. Prof. Slavica Kozina, PhD	Type of instruction (number of hours)	L	S	E	T
			10		15	
Status of the course	Elective	Percentage of application of e-learning				

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	The purpose of this elective is to improve students communication skills not only in everyday's but also in their professional life, now as students, tomorrow as medical doctors.
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	This elective is designed for the students motivated to learn about more positive impact on medical practice by using adequate style of communication. Effective communication can help students to understand better a patient's problem, the impact it has on patients life and relationship and also how to menage the problem in patient's life. Effective communication skills are vital for reducing the risk of error in clinical practice as well as avoiding complaints about one's practice.
Course content broken down in detail by weekly class schedule (syllabus)	1. Basic communication skills 2. The medical interview 3. Giving information 4. Breaking bad news 5. Taking a sexual history 6. Communicating with patients from different cultural backgrounds

Format of instruction	x lectures x seminars and workshops ☐ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work	x independent assignments x multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.	

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*	Class attendance		Research		Practical training	1,5

Grading and evaluating student work in class and at the final exam	Written examination, in-course discussion		
Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	Journal articles in the topic of communication skills Lloyd M, Bor R.Communication Skills for Medicine, Elsevier		yes

Optional literature (at the time of submission of study programme proposal)	
Quality assurance methods that ensure the acquisition of exit competences	▪ Teaching quality analysis by students and teachers ▪ Exam passing rate analysis ▪ Committee for control of teaching reports ▪ External evaluation
Other (as the proposer wishes to add)	

NAME OF THE COURSE		**DOCTOR, MY BACK IS KILLING ME**				
Code	MFMI184	Year of study	4th, 5th and 6th year of Medicine, 4th year of Dental Medicine			
Course teacher	Assist.Prof. Ivica Bilic, MD	Credits (ECTS)	2			
Associate teachers	Assist.Prof. Jure Aljinovic, MD, PhD Ass.Prof. Kresimir Dolic, MD, PhD Mario Mihalj, MD, PhD Kresimir Kolic, MD Vana Kosta, MD, PhD Mirko Lapcic, MD Grgo Gunjaca, MD, PhD Toni Kljakovic-Gaspic, MD	Type of instruction (number of hours)	L	S	E	T
			9	12	4	
Status of the course	Elective	Percentage of application of e-learning	0			
COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	Finished course in Neurology					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	1. Early recognition and accurate treatment of low back pain 2. Clinical evaluation of a patient with low back pain 3. Rational diagnostic evaluation of patient with low back pain 4. Importance of individual assessment in evaluation of patient with low back pain 5. Multidisciplinary approach to patient with low back pain					
Course content broken down in detail by weekly class schedule (syllabus)	LECTURES - 1. Functional anatomy of lumbosacral spine (2) - Aljinovic 2. Radiologic diagnostic of lumbosacral syndrome (2) - Kolic/Dolic 3. Epidemiology and importance of low back pain (2) - Bilic 4. Surgical treatment of lumbosacral syndrome - where, when, how and why? (2) - Lapcic 5. Working ability evaluation of the patient with low back pain (1) - Bilic SEMINARS - 1. Clinical picture of lumbosacral syndrome (2) - Kosta 2. EMNG diagnostic of lumbosacral syndrome (2) - Mihalj 3. Differential diagnosis of low back pain (2) - Kosta 4. Role of physical medicine specialist in evaluation of patient with low back pain (2) - Aljinovic 5. Treatment of low back pain -approach by anesthesiologist (1) - Kljakovic-Gaspic 6. Low back pain patient in general practice (2) - Gunjaca 7. Pharmacotherapy of low back pain (1) - Bilic EXERCISE - 1. Active life - prevention of low back pain (2) - Primorac 2. Protrusion/extrusion of intervertebral disc - before and after surgery (2) - Lapcic

Code	MFMI165	Year of study	4th and 5th			
Course teacher	Prof. Krešimir Rotim, MD, PhD	Credits (ECTS)	2			
Associate teachers		Type of instruction (number of hours)	L	S	E	T
			10	6	9	
Status of the course	Elective	Percentage of application of e-learning				

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	Neurosurgery exam passed
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	On successful completion of this course, students will be able to: 1. Describe the pathophysiology and patterns of neuro-trauma 2. Triage patients for urgent radiological diagnostics 3. Identify neuro-trauma patients that require urgent surgical treatment 4. Explain the objectives in neuro-trauma surgery 5. Define the principles and outcomes brain injury
Course content broken down in detail by weekly class schedule (syllabus)	Lectures (10 hours): - Epidemiology, burden of the disease, mechanisms of injury – Classification of traumatic brain injury (TBI), assessment of neuro-trauma patient - Prehospital and initial hospital management of severe traumatic brain injury patients; neuro-imaging - Operative care, indications, timing including decompressive craniotomy - Intracranial pressure and neuro-monitoring (methods, timing) - Mild traumatic brain injury: epidemiology, mechanisms, typical presentation Seminars (6 hours): - Case presentation 1.: Epidural hematoma and skull fracture - Case presentation 2.: Subdural hematoma Exercises (9 hours): -Neurosurgery operating theatre visit: introduction -Neurosurgery operating theatre visit: organization
Format of instruction	☐ **lectures** ☐ **seminars and workshops** ☐ **exercises** ☐ *on line* in entirety ☐ partial e-learning ☐ field work ☐ independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

COURSE DESCRIPTION

Course enrolment requirements and entry competences required for the course	None
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	To be prepared to embrace the changes in ever-changing field of medicine; to identify credible sources of information; to be competent in searching the existing data sources on the latest developments and technological advances in medicine; to think critically about the possible directions of development of medicine in the near and more distant future; to understanding the forces behind the changes in medical practices
Course content broken down in detail by weekly class schedule (syllabus)	Medicine and society: the past and the future (2h lecture) Biggest medicinal mistakes of the past - lessons not to be forgotten (1h seminar) Top 10 achievements in medicine (1h seminar) The future of technology in medicine (1h seminar) The future of surgery and robotics (1h seminar) The future of transplantation medicine (1h seminar) The future of genetics (1h seminar) Biobanks and future medicine (1h seminar) Genetics in the public domain and personal use (2h seminar) Who wants to live forever? (1h seminar) Development of new medications– cost vs. gain? (1h seminar) Global health challenges and medicine in the future (2h lecture) Changing landscapes of modern society and demands on health care – demographical changes, economic, environmental changes (2h seminar) Infectious diseases of the future and antimicrobial resistance (2h seminar) Pandemics of chronic non-communicable diseases – current trends and future expectations (2h seminar) Physician of the future (2h seminar) Future of the medicine – where and when to expect the biggest change? (1h lecture, 1h seminar)
Format of instruction	X lectures X seminars and workshops ☐ exercises ☐ *on line* in entirety ☐ partial e-learning ☐ field work x independent assignments ☐ multimedia ☐ laboratory ☐ work with mentor ☐ (other)
Student responsibilities	In accordance to Rules of studying and Deontological code for USSM students.

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is*						
	Class attendance	0.5	Research		Practical training	
	Experimental work		Report		(Other)	
	Essay		Seminar essay	0.75	(Other)	
	Tests		Oral exam	0.75	(Other)	

equal to the ECTS value of the course)	Written exam		Project		(Other)	
Grading and evaluating student work in class and at the final exam	Critical discussions, seminar presentation					

	Title	Number of copies in the library	Availability via other media
Required literature (available in the library and via other media)	Lectures - handouts		
	Selected scientific papers (PubMed)		
	Other relevant sources from the Internet (YouTube, official web pages of different scientific institutes and organizations)		
Optional literature (at the time of submission of study programme proposal)			
Quality assurance methods that ensure the acquisition of exit competences	▪ Teaching quality analysis by students and teachers ▪ Exam passing rate analysis ▪ Committee for control of teaching reports ▪ External evaluation		
Other (as the proposer wishes to add)			

NAME OF THE COURSE	**Pathophysiology of endocrinopathies**					
Code	MFMI24	Year of study	2-6			
Course teacher	Assoc.prof. Tina Tičinović Kurir, MD, PhD	Credits (ECTS)	2			
Associate teachers	Assist.prof. Joško Božić, MD, PhD Assist.prof. Mladen Krnić, MD, PhD Anela Novak, MD, PhD Prof. Veselin Škrabić, MD, PhD Marino Vilović, MD	Type of instruction (number of hours)	L	S	E	T
			10	10	5	25
Status of the course	Elective	Percentage of application of e-learning	0%			
COURSE DESCRIPTION						
Course enrolment requirements and entry competences required for the course	None					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- interpret underlying pathophysiological mechanisms of the endocrinopathies - describe and explain the clinical features associated with the most common disorders of the endocrine system					

<table>
<tr><td></td><td colspan="6">- describe, analyze and discuss systemic disorders related to the endocrine system
- explain and critically interpret the tests used in the diagnosis of endocrinopathies</td></tr>
<tr><td>Course content broken down in detail by weekly class schedule (syllabus)</td><td colspan="6">Lectures (10 hours)
1. Pathophysiological mechanisms of endocrinopathies
2. Pathophysiology of diabetes mellitus
3. Thyroid and parathyroid glands diseases
4. Pituitary disorders
5. Metabolic and endocrine disorders in OSA patients

Seminars (10 hours)
1. Adrenal glands diseases (3h)
2. Pathophysiology of osteoporosis (2h)
3. Review of basic diagnostic tests in endocrinology (3h)
4. CAH and disorders of sex hormones

Practice (5 hours)
1. Problem exercise</td></tr>

NAME OF THE COURSE	**Elective course: Research protocol for your diploma thesis**					
Code	MFMI169	Year of study	5			
Course teacher	Prof. Ana Marušić	Credits (ECTS)	2			
Associate teachers	Prof. Matko Marušić, Ivan Buljan,MSc Ružica Tokalić, MD	Type of instruction (number of hours)	L	S	E	F
			10		15	
Status of the course	Elective	Percentage of application of e-learning				
COURSE DESCRIPTION						
Course objectives	To familiarize students with protocol planning and writing for their final thesis.					
Course enrolment requirements and entry competences required for the course	There are no requirements – the course is opened to all students. (We recommend that students are familiar with the potential mentor and research theme prior to the course)					
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- Understanding of methodological principles necessary for writing of research thesis - Ability to perform literature search - Planning of potential cooperation and ICMJE criteria - Scientific writing					
Course content broken down in detail by weekly class schedule (syllabus)	Each day will start with 2 hours of lectures, followed by 3 hours of vježbi. Each day will be dedicated to new aspects of research plan development and writing **Day 1** Lecture: Title, research aims and hypothesis, Literature search Seminar: Protocol writing I **Day 2** Lecture: Introduction and types of research Seminar: Protocol writing II **Day 3** Lecture: Sampling Seminar: Protocol writing III **Day 4** Lecture: Data analysis Seminar: Protocol writing IV **Day 5** Lecture: Potential value of findings and ICMJE criteria Seminar: Protocol writing V					
	☒ lectures					

Format of instruction	☒ exercises ☐ mixed e-learning ☒ independent assignments					
Student responsibilities	Presence at teaching activities: 80% lectures, 100% seminars.					
Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*	Class attendance	0.25	Individual assignments (Course essay)	1.75		

Grading and evaluating student work in class and at the final exam	Written seminar and course assignments		
Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**

NAME OF THE COURSE	**Elective course: Science for society – responsible research and innovation**		
Code	MFMI168	Year of study	1-6
Course teacher	Prof. Ana Marušić	Credits (ECTS)	2

Associate teachers	Assist. Prof. Shelly Pranić, PhD Ivan Buljan, MSc Ružica Tokalić, MD	Type of instruction (number of hours)	L	S	E	F
			10		15	
Status of the course	Elective	Percentage of application of e-learning				

COURSE DESCRIPTION

Course objectives	To familiarize students with the responsible research and innovation (RRI), which is in the heart of research effort worldwide, including EU research programmes.
Course enrolment requirements and entry competences required for the course	There are no requirements – the course is opened to all students.
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- Critical understanding of the responsible research and innovation, especially the responsibility of science to society - Use available tools for research transparency - Recognition of structure of clinical trial registries - Understanding the role of medical doctors and researcher in knowledge dissemination and responsible application of research in society - Creation of educational material about medical research for the public.
Course content broken down in detail by weekly class schedule (syllabus)	Each day will start with 2 hours of lectures, followed by 3 hours of practical work. Each day will be dedicated to important aspects of responsible research and innovation. **Day 1** Lecture: Responsible research Practical: Discussion of case studies **Day 2** e-Lecture: Responsible innovation Practical: Discussion of case studies **Day 3** e-Lecture: Open access Practical: Discussion of case studies **Day 4** e-Lecture: Ethics in research Practical: Discussion of case studies **Day 5** Lecture: Including public in research, responsible governance of research and innovation Science Café: card game on responsible conduct of research
Format of instruction	☒ lectures ☒ exercises ☐ mixed e-learning ☒ independent assignments

NAME OF THE COURSE	**Sport and steroid abuse**					
Code	MFMI181	Year of study	1-6			
Course teacher	Assoc. prof. Snježana Mardešić, MD, PhD	Credits (ECTS)	2			
Associate teachers		Type of instruction (number of hours)	L	S	E	F
			10	15		
Status of the course	Elective	Percentage of application of e-learning				

COURSE DESCRIPTION	
Course objectives	Understanding and learning about the importance of exercise on overall health and harmful use of prohibited substances
Course enrolment requirements and entry competences required for the course	None
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Explain and describe the main characteristics of the musculoskeletal system, and anatomical and histological structure of large muscle groups. Define and explain the process of exercise, the basics of planning and exercise program. Determine which types of exercise affect the targeted muscle groups. Explain the pros and cons of diet supplements, and observe the harmful effects of prohibited substances.
Course content broken down in detail by weekly class schedule (syllabus)	Lectures (20 hours): Number of hours: Basics of myology 3 Muscles under the microscope 3 How to train? 4 Seminars (5 hours): Number of hours:

	Supplements 5 Steroids 5 New researches in physiology of sports and steroid abuse 5	
Format of instruction	☒ lectures ☒ seminars and workshops	
Student responsibilities		

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*						
	Oral examination (2 ECTS)					

Grading and evaluating student work in class and at the final exam	Students will have an assignment in which they need to analyze an article and discuss it.		
Required literature (available in the library and via other media)	**Title**	**Number of copies in the library**	**Availability via other media**
	Anabolic steroids detected in bodybuilding dietary supplements - a significant risk to public health. Abbate V, Kicman AT, Evans-Brown M, McVeigh J, Cowan DA, Wilson C, Coles SJ, Walker CJ. Drug Test Anal. 2015 Jul;7(7):609-18		Online

NAME OF THE COURSE	PHYSICS OVERVIEW (SELECTED TOPICS)					
Code	MFMI155	Year of study	1			
Course teacher	Assoc. Prof. Marija Raguž, PhD	Credits (ECTS)	2			
Associate teachers	Zvonimir Boban, MSc Ana Puljas, MSc	Type of instruction (number of hours)	L	S	E	F
			8	8	9	
Status of the course	Elective course	Percentage of application of e-learning	0			

COURSE DESCRIPTION		
Course objectives	Brief overview of the physical backgrounds necessary for successful attendance of the course: Medical physics and biophysics. It is recommended for all students with none or insufficient backgrounds in physics and (or) mathematics.	
Course enrolment requirements and entry competences required for the course	None	
Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	Competence in application of physics to study of human body and diagnostic tools in terms of: 1. Medical ultrasound 2. Radiology 3. Nuclear medicine imaging 4. Human sensory functions 5. Function of heart and circulation 6. Biomechanics	
Course content broken down in detail by weekly class schedule (syllabus)	1. Elementary mathematics 2. Structure of matter 3. Physical quantities 4. Classical mechanics 5. Rotation, rigid body 6. Deformation, elasticity 7. Mechanical waves 8. Electromagnetism 9. Geometrical optics 10. Thermodynamics 11. Fluids	2S+1E 1S 1S 2L+1S+2E 1L+1E 1L 1S+1E 3L+2E 1S+1E 1S 1L+1E
Format of instruction	x lectures x seminars x exercises	
Student responsibilities	Read the provided materials.	

Screening student work *(name the proportion of ECTS credits for each activity so that the total number of ECTS credits is equal to the ECTS value of the course)*	Written examination (2 ECTS)					

Grading and evaluating student work in class and at the final exam	Written examination, in-course discussion

3. STUDY PERFORMANCE CONDITIONS

3.1. Places of the study performance

Buildings of the constituent part (name existing, under construction and planned buildings)	
Identification of building	Basic science building (BSB), A Building
Location of building	Šoltanska 2, Križine, Split
Year of completion	1976
Total square area in m^2	4802
Identification of building	Teaching and administration, B Building
Location of building	Šoltanska 2, Križine, Split
Year of completion	2011
Total square area in m^2	4700
Identification of building	Hostel for visiting professors and restaurant, C building
Location of building	Šoltanska 2, Križine, Split
Year of completion	2014
Total square area in m2	1531
Identification of building	Pathology and anatomy complex (PAK)
Location of building	Spinčićeva 1, Firule, Split
Year of completion	1986
Total square area in m2	2800

3.2. List of teachers and associate teachers

Course	Teachers and associate teachers
Anaesthesiology and Intensive Medicine	Assist. Prof. Nenad Karanović Assist. Prof. Mladen Carev Assist. Prof. Marko Jukić Assist. Prof. Mihajlo Lojpur Vjera Marinov, PhD Božena Ivančev, PhD Ivan Agnić, PhD Božidar Duplančić Dragica Kopić Željko Ninčević Dubravka Kocen
Anatomy	Prof. Ivica Grković Prof. Ana Marušić Prof. Katarina Vukojević Assist. Prof. Natalia Filipović Antonia Jeličić-Kadić, PhD Milka Jerić, MD Ana Vuica, MD
Basic Neuroscience	Assist. Prof. Renata Pecotić Prof. Zoran Đogaš Prof. Ivica Grković Prof. Maja Valić Ivana Pavlinac, PhD Linda Lušić, Mag. Psych. Ivona Stipica, MD
Basics of Med. Microbiology and Parasitology	Prof. Marija Tonkić Prof. Marinko Dobec Assist. Prof. Ivana Goić Barišić Katarina Šiško Kraljević, PhD Anita Novak, MD Žana Rubić, MD Vanja Kaliterna, PhD Merica Carev, MD Marina Radić, MD
Clinical microbiology and parasitology	Prof. Marija Tonkić Assist. Prof. Ivana Goić-Barišić Katarina Šiško-Kraljević, PhD Novak Anita, MD
Clinical Oncology	Prof. Eduard Vrdoljak Marijo Boban, MD Tomislav Omrčen, MD Branka Petrić Miše
Clinical rotation: Internal Medicine	Assist. Prof. Vedran Kovačić
Clinical rotation: Medical Emergencies	Prof. Julije Meštrović
Clinical rotation: Mother and Child	Prof. Marijan Saraga
Clinical rotation: Surgery	Assist. Prof. sc. Davor Todorić
Clinical skills I, II	Assist. Prof. Marko Jukić Assist. Prof. Nenad Karanović Assist. Prof. Mladen Carev Assist. Prof. Mihajlo Lojpur Branka Polić, MD

3.3. Curriculum vitae of the course teacher

First and last name and title of teacher	Nenad Karanović, assistant-professor
The course he/she teaches in the proposed study programme	Anesthesiology and Intensive Medicine
GENERAL INFORMATION ON COURSE TEACHER	
Address	Poljička cesta 7, 21000 Split
Telephone number	091 51 77 880
E-mail address	nkaranov@yahoo.com
Personal web page	none
Year of birth	1955.
Scientist ID	275856
Research or art rank, and date of last rank appointment	Senior scientific associate, 2013
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Assistant-professor, 2010.
Area and field of election into research or art rank	Anesthesiology and Intensive Medicine
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	University Hospital Centre Split, University of Split School of Medicine
Date of employment	1981. 2006.
Name of position (professor, researcher, associate teacher, etc.)	Staff anestehsiologist and intensivist
Field of research	Anesthesiology and intensive care, Neuroscience
Function	Head of the Department
INFORMATION ON EDUCATION – Highest degree earned	
Degree	PhD
Institution	University of Split School of Medicine
Place	Split
Date	2010.
INFORMATION ON ADDITIONAL TRAINING	
Year	203-2007
Place	Zagreb, Budapest, Zurich, Milwaukee
Institution	UH Dubrava, Semmelweis university, Triemli hospital, Froedtert hospital, Veteran affairs hospital
Field of training	Cardiac anesthesia and intensive medicine
MOTHER TONGUE AND FOREIGN LANGUAGES	
Mother tongue	Croatian
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	English 5
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	French 2
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	
COMPETENCES FOR THE COURSE	

Earlier experience as course teacher of similar courses (name title of course, study programme where it is/was offered, and level of study programme)	Anesthesiology and Intensive medicine, dental medicine, medicine First aid, medicine Clinical care in urgency, university study Electives
Authorship of university/faculty textbooks in the field of the course	Emergency medicine 2011., Hitna medicina 2013, Emergency medicine 2013, one chapter Intenzivna medicina 2008. one chapter
Professional, scholarly and artistic articles published in the last five years in the field of the course (5 works at most)	1. Carev M, **Karanovic N**, Kocen D, Bulat C. Useful suplement to the best practice of using levosimendan in cardiac surgery patients: 2,5 mg intravenous bolus for cardiopulmonary resuscitation during perioerative cardiac arrest. *J Cardiothorac Vasc Anesth* 2013; 27: e75-e77. DOI: 10.1053/j.jvca.2013.07.018. 2. Marinov V, Valić M, Pecotić R, **Karanović N**, Pavlinac Dodig I, Carev M, Valić Z, Đogaš Z. Sevoflurane and isoflurane monoanesthesia abolished the phrenic long-term facilitation in rats. Respir Physiol Neurobiol 2013; 189: 607-613. 3. Professional and scholarly articles published in the last five years in subjects of teaching methodology and teaching quality (5 works at most)	
Professional, science and artistic projects in the field of the course carried out in the last five years (5 at most)	- 2007.-now. Researcher in scientific grant of Croatian Ministry of Science, Education, and Sport “Neural control of breathing in sleep and alert state”. Main researcher Zorn Đogaš, MD, PhD, professor. - 2014 – now: Reasercher in scientific grant of Croatian Science Foundation: „Translational research on neuroplasticity of breathing and effect of intermittent hypoxia in anesthesia and sleep“. Main researcher Zoran Đogaš, MD, PhD, professor

The name of the programme and the volume in which the main teacher passed exams in/acquired the methodological-psychological-didactic-pedagogical group of competences	- 2007. Intensive Training Course on General Didactics TEMPUS-Project STEAMED. Beč, Austrija. Mentor prof. dr. sc. Gottfried Csanyi - 2007.Tečaj INTEL-M „Train the Trainee Seminar“ (microteaching, OSCE, PBL, clinical skill, sandwich), Split. - 2006. Intensive Training Course in Pedagogy and Didactics in Medical Education TEMPUS-Project STEAMED. Beč, Austrija. Mentori prof dr. sc. Richard

First and last name and title of teacher	Professor Ivica Grković, MD, MSc, PhD.
The course he/she teaches in the proposed study programme	Anatomy
GENERAL INFORMATION ON COURSE TEACHER	
Address	School of Medicine, University of Split, Šoltanska 2, 21000 Split
Telephone number	+385 21 557 803
E-mail address	ivica.grkovic@mefst.hr
Personal web page	
Year of birth	1964
Scientist ID	**173423**
Research or art rank, and date of last rank appointment	Scientific advisor, 2009.
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Full professor, 11. September 2014.
Area and field of election into research or art rank	Biomedicine and health, preclinical medicine, anatomy
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	School of Medicine, University of Split
Date of employment	September 2004.
Name of position (professor, researcher, associate teacher, etc.)	Full professor
Field of research	Anatomy and neurobiology
Function	Head of the Department of anatomy
INFORMATION ON EDUCATION – Highest degree earned	
Degree	PhD
Institution	Department of anatomy and neuroscience, University of Melbourne
Place	Melbourne, Australia
Date	November 1997.
INFORMATION ON ADDITIONAL TRAINING	
Year	1992-2004
Place	Melbourne, Australia
Institution	The University of Melbourne
Field of training	Anatomy and neurobiology of the autonomic nervous system
MOTHER TONGUE AND FOREIGN LANGUAGES	
Mother tongue	Croatian

Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	English, 5
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	Italian, 2
COMPETENCES FOR THE COURSE	
Earlier experience as course teacher of similar courses (name title of course, study programme where it is/was offered, and level of study programme)	'Lecturer' (1998-2002) and 'Senior Lecturer' (2003-2004); Anatomy and neuroscience, The University of Melbourne, Australia
Authorship of university/faculty textbooks in the field of the course	1. (2012) Ways to address the challenges of a modern medical curriculum: living academic medicine at the University of Split, School of Medicine. *Acta Med Acad*. 41(1):7-17.
Professional, science and artistic projects in the field of the course carried out in the last five years (5 at most)	*Principal investigator on a project by MZOŠ: 'Mechanisms of cardiac pain in ageing, ischemia and metabolic diseases' (2007-2013).*
The name of the programme and the volume in which the main teacher passed exams in/acquired the methodological-psychological-didactic-pedagogical group of competences?-pedagoške kompetencije?	Continuos obligatory educational courses to gain university titles 'Lecturer' (1998-2002) and 'Senior Lecturer' (2003-2004) at the University of Melbourne on how to lecture/teach effectively and how to balance academic duties.
PRIZES AND AWARDS, STUDENT EVALUATION	
Prizes and awards for teaching and scholarly/artistic work	Department of anatomy was voted the best department in the School of medicine at the University of Split in 2009 by student evaluations.
Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	University of Split formal student evaluation, average grade for professor Ivica Grkovic is 4.8 with mainly very positive comments by students.

First and last name and title of teacher	Professor Maja Valić, MD, PhD
The course he/she teaches in the proposed study programme

The course of continuing medical education "Skill for education and scientific work". University of Split School of Medicine, Split.2008 year
PRIZES AND AWARDS, STUDENT EVALUATION	
Prizes and awards for teaching and scholarly/artistic work	no
Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	Currently data unavailable (should be taken by the Split University)

First and last name and title of teacher	Miroslav Šimunić, professor
The course he/she teaches in the proposed study programme	Internal medicine
GENERAL INFORMATION ON COURSE TEACHER	
Address	Škrape 52, 21 000 Split, Croatia
Telephone number	+385 21/556-002
E-mail address	miroslav.simunic@gmail.com
Personal web page	

Year of birth	1958
Scientist ID	**146175**
Research or art rank, and date of last rank appointment	Scientific adviser, 13. Nov 2013
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Associate professor, 05. May 2009.
Area and field of election into research or art rank	Biomedicine and Health care, Clinical medical science, Internal medicine
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	Internal Clinic, Clinical Hospital Split, Split, Croatia
Date of employment	02. December 1985
Name of position (professor, researcher, associate teacher, etc.)	Professor
Field of research	Gastroenterology
Function	Gastroenterologist
INFORMATION ON EDUCATION – Highest degree earned	
Degree	Medical doctor
Institution	School of Medicine,
Place	University of Zagreb
Date	30. June 1981
INFORMATION ON ADDITIONAL TRAINING	
Year	Postgraduate study course in clinical pharmacology
Place	School of Medicine,
Institution	University of Zagreb
Field of training	Clinical pharmacology
MOTHER TONGUE AND FOREIGN LANGUAGES	
Mother tongue	Croatian
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	English 4
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	German 3
Foreign language and command of foreign language on a scale from 2 (sufficient) to 5 (excellent)	
COMPETENCES FOR THE COURSE	
Earlier experience as course teacher of similar courses (name title of course, study programme where it is/was offered, and level of study programme)	25 years expirience as course teacher, last ten years course leader, in Department of Internal medicine, School of Medicine Split
Authorship of university/faculty textbooks in the field of the course	
Professional, scholarly and artistic articles published in the last five years in the field of the course (5 works at most)	1. Ajduković J, Tonkić A, Salamunić I, Hozo I, **Šimunić M,** Bonacin D. Interleukins IL-33 and IL17/IL17A in patients with ulcerative colitis. Hepatogastroenterology 2010;57(104):1442-4. 2. Perko Z, Cala Z, Mimica Z, Stipić R, Bakotin T, Kraljević J, Radonić V, Strinić T, Jakus IA, **Šimunić M.** First Croatian transvaginal laparoscopically assisted cholecystectomies. Hepatogastroenterology. 2012;59(114):351-2. 3. Tonkić A, Tonkić M, Brnić D, Novak A, Puljiz Z, **Šimunić M.** Time trends of primary antibiotic resistance of *Helicobacter pylori* isolates in Southern Croatia. J Chemother 2012;24(3):182-4. **4. Šimunic M**, Fabijanic D, Perkovic N, Bogdanovic Z, Maras-Simunic M, Batinic T, Tonkic A. Acute mesenteric ischemia due to superior mesenteric artery embolism in a patient with

	permanent atrial fibrillation. Signa Vitae 2010;5(1):40-3. 5. Cambj–Sapunar L, Piplović–Vuković T, **Šimunić M**, Ardalić Ž, Tonkić A, Perković N, Maras–Šimunić M. Posttraumatic hepatic artery pseudoaneurysm presented as a gastrointestinal bleeding. Signa Vitae 2014. (accepted))
Professional and scholarly articles published in the last five years in subjects of teaching methodology and teaching quality (5 works at most)	
Professional, science and artistic projects in the field of the course carried out in the last five years (5 at most)	**2009.-2013.** Active collaborator on the project of the Ministry of Science no. 2008-034 "Development of a nationa database of knowledge about colorectal cancer", leader Prof. Nikica Druzijanic.
The name of the programme and the volume in which the main teacher passed exams in/acquired the methodological-psychological-didactic-pedagogical group of competences?	
PRIZES AND AWARDS, STUDENT EVALUATION	
Prizes and awards for teaching and scholarly/artistic work	
Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	Results of student evaluation for the same course for the year: 2011 = 4,7; 2012 = 4,9; 2013 = 3,0 ; average = 4,2 (grading scale 1-5)

First and last name and title of teacher	**Full proffessor, TATIJANA ZEMUNIK**
The course he/she teaches in the proposed study programme	Medical biology
GENERAL INFORMATION ON COURSE TEACHER	
Address	Šoltanska 2
Telephone number	021 557 888

Year of birth	1964.
Scientist ID	202381
Research or art rank, and date of last rank appointment	Scientific adviser, 06.05.2008.
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Full proffessor, 15.07.2010
Area and field of election into research or art rank	Biomedicine and health, basic medical science
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	School of Medicine Split
Date of employment	1992.
Name of position (professor, researcher, associate teacher, etc.)	professor
Field of research	Population genetics
Function	Head of the Department, project leader

INFORMATION ON EDUCATION – Highest degree earned	
Degree	Ph.D.
Institution	School of Medicine Zagreb
Place	Zagreb
Date	1997.
INFORMATION ON ADDITIONAL TRAINING	
Year	2011.
Place	Edinburg, UK
Institution	MRC Human Genetics Unit, Western general hospital
Field of training	Statistical genetics
Year	2008
Place	Split, Cratia
Institution	ESGM's remote training center of Split
Field of training	European School of Genetic Medicine, Hybrid course in non-invasive prenatal diagnosis
Year	2004
Place	Split, Croatia
Institution	Remote Centre for Applied Medical Statistics – University of Cambridge
Field of training	Practical course "Instructory Statistics and Research Methods and Getting started with SPSS
Year	2003.
Place	Edinburg, UK
Institution	MRC Human Genetics Unit, Western general hospital
Field of training	Specifics of some molecular biology techniques
Year	1999.
Place	Bielefeld
Institution	Institute of Cell Culture Technology, Faculty of Technical Science, University of Bielefeld, The Deutschen Akademischen Austauschdienstes (DAAD) sponsored visit.
Field of training	Cell culture
Year	1999.
Place	Dubrovnik
Institution	Institute Ruđer Bošković
Field of training	Practical course of molecular biology
Year	1998.
Place	Bielefeld
Institution	Institute of Cell Culture Technology, Faculty of Technical Science, University of Bielefeld, The Deutche Forschungsgemeinschaft (DFG), Sonderforschungbereich (SFB-549) project of Dr. Muthing, sponsored visit.
Field of training	Cell culture
Year	1998.
Place	Bielefeld

COMPETENCES FOR THE COURSE	
Earlier experience as course teacher of similar courses (name title of course, study programme where it is/was offered, and level of study programme)	"Medical biology – Medical study , Medical study in English and Dental study University of Split, School of Medicine „Biology of the plants and animals" Pharmacy study, University of Split, School of Medicine and Faculty for Chemical Technology "Biology" and "Cell biology and Elements of Genetics"– University Department of Health Studies, University of Split "Genetic basis of development"; "Genetics of type 1 diabetes"; "How do tumours develop?" elective courses - Medical study,
	University of Split, School of Medicine „ Tumour Cytogenetics", "Genetic analysis of complex diseases, genetic statistics and genomic databases" doctoral studies Tumour Biology and Translational Research in Biomedicine, University of Split School of Medicine "Molecular biology in medicine" (lectures, seminars, student lab/practicum) – Vocational Study Nursing - University of Split, School of Medicine „Cell biology and genetics" Medical study, University of Mostar, BIH „Variations in the genome: the contribution of the emergence of complex diseases" - doctoral study University of Mostar, BIH
Authorship of university/faculty textbooks in the field of the course	Peruzović M., Zemunik T.: Medicinska biologija, Priručnik za mikroskopske vježbe (Medical Biology, Manual for microscopic practice) Department of biology, University of Split School of Medicine, 2010. Translation of the book: Cox and Sinclair. Emery Elements of Medical Genetics. 14th ed. (4. chapter) 2011. Translation of the book: Cooper GM, Hausman RE. The Cell, A Molecular Approach, 5th ed. (11. chapter) 2010.
Professional, scholarly and artistic articles published in the last five years in the field of the course (5 works at most)	1. Köttgen A, Albrecht E, Teumer A, Vitart V, Krumsiek J, Hundertmark C, Pistis G, Ruggiero D, O'Seaghdha CM, Haller T, Yang Q, Tanaka T, Johnson AD, Kutalik Z, Smith AV, Shi J, Struchalin M, Middelberg RP, Brown MJ, Gaffo AL, Pirastu N, Li G, Hayward C, Zemunik T,... (and 223 more). Genome-wide association analyses identify 18 new loci associated with serum urate concentrations. Nat Genet. 2013;45:145-54. 2. Pehlić M, Vrkić D, Skrabić V, Jerončić A, Stipančić G, Urojić AŠ, Marjanac I, Jakšić J, Kačić Z, Boraska V, Zemunik T*. IL12RB2 gene is associated with the age of type 1 diabetes onset in Croatian family Trios. PLoS One. 2012;7:e49133. 3. Yang J, Loos RJ, Powell JE, … (59 more), Zemunik T, ... (and 108 more). FTO genotype is associated with phenotypic variability of body mass index. Nature. 2012;490:267-72. 4. Scott RA, Lagou V, Welch RP,… (115 more), Zemunik T,... (and 95 more). Large-scale association analyses identify new loci influencing glycemic traits and provide insight into the

	underlying biological pathways. Nat Genet. 2012 Sep;44:991-1005. 5. Kuzmanić Šamija R, Primorac D, Rešić B, Lozić B, Krželj V, Tomasović M, Stoini E, Šamanović L, Benzon B, Pehlić M, Boraska V, Zemunik T*. Association of NOS3 tag polymorphisms with hypoxic-ischemic encephalopathy. Croat Med J. 2011;52:396-402.
Professional and scholarly articles published in the last five years in subjects of teaching methodology and teaching quality (5 works at most)	/
Professional, science and artistic projects in the field of the course carried out in the last five years (5 at most)	Since 2014. Primary investigator of the HRZZ investigation project „Identification of new genetic loci implicated in regulation of thyroid and parathyroid function“ No. 1498 Since 2014. Collaborator of the HRZZ project for young scientist „Genome wide association study of Hashimoto thyroiditis“ primary investigator dr. V. Boraska, associated professor 2007-2013 primary investigator of the scientific project “Genetic epidemiology of diabetes mellitus type 1 in the Croatian population”, MZOŠ No. 216-1080315-0293. 2007-2013. Research associate on the program “Croatian Biobank: Resource for Analyzing Health and Disease Determinants in Population” supervised by Prof. Igor Rudan, funded by Ministry of Science, Education and Sports of the Republic of Croatia, European Framework programme 6, The Medical Research Council UK, The Royal Society UK, The WellcomeTrust, U.S. National Institutes of Health (NIH) and The British Council 2007-2013 collaborator in the scientific project “Pathobiochemistry of glycosphingolipid antigens” MZOŠ No. 216-2160133-0066, primary investigator dr. A. Markotić, professor.
The name of the programme and the volume in which the main teacher passed exams in/acquired the methodological-psychological-didactic-pedagogical group of competences?-pedagoške kompetencije?	Medical biology
PRIZES AND AWARDS, STUDENT EVALUATION	
Prizes and awards for teaching and scholarly/artistic work	Awarded for the best teaching text at the Split School of Medicine in the academic year 2010/2011. Awarded for the first author of the highest impacted CC paper published at the Split School of Medicine in the academic year 2004/2005.
Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	4,4

First and last name and title of teacher	Assistant professor Vedrana Čikeš Čulić
The course he/she teaches in the proposed study programme	Medical Chemistry and Biochemistry, Medical Studies in English

Research or art rank, and date of last rank appointment	Scientific collaborator, 31.3.2010.
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Assistant professor, 31.3.2010.
Area and field of election into research or art rank	Area: Biomedicine and health; Field: Pharmacy
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	University of Split School of Medicine
Date of employment	1.9.2004.
Name of position (professor, researcher, associate teacher, etc.)	Assistant professor
Field of research	Medical chemistry and biochemistry
Function	Teacher
INFORMATION ON EDUCATION – Highest degree earned	
Degree	PhD
Institution	Faculty of Pharmacy and Medical Biochemistry, University of Zagreb
Place	Zagreb
Date	16.7.2009.
INFORMATION ON ADDITIONAL TRAINING	
Year	2000/2001
Place	Split, Croatia
Institution	Clinical hospital Split, Department of Medical Laboratory Diagnostics
Field of training	Medical laboratory diagnostcs
Year	September 2009.
Place	Antwerpen, Belgium
Institution	Antwerpen University Hospital, Laboratory of Cellular and Molecular Cardiology
Field of training	EPC (endothelial progenitor cells) analysis, EMP (endothelial microparticles) analysis, EPC culture
Year	29.8.2012. – 1.4.2013.
Place	Baltimore, USA
Institution	Johns Hopkins University
Field of training	Postdoctoral fellow in molecular biology – cancer research
MOTHER TONGUE AND FOREIGN LANGUAGES	
Mother tongue	Croatian

The name of the programme and the volume in which the main teacher passed exams in/acquired the methodological-psychological-didactic-pedagogical group of competences?-pedagoške kompetencije?	Active teacher in anatomy since 1986, research in education, expertise from international conferences on education, collaboration with the Agency for science and higher education.
PRIZES AND AWARDS, STUDENT EVALUATION	
Prizes and awards for teaching and scholarly/artistic work	2006. – State award for Excellence in Science, Parliament of the Republic of Croatia. 2002. – Strossmayer Award, Croatian Academy of Arts and Sciences. 2001. – Strossmayer Award, Croatian Academy of Arts and Sciences. 1999. – National decoration for contribution to science
Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	University of Split student evaluation: Average mark for anatomy courses for medical and dental medicine students and 6 courses in research methodology higher than 4 (on a scale from 1 to 5).

First and last name and title of teacher	Ana Marušić
The course he/she teaches in the proposed study programme	Research in Biomedicine and Health Anatomy
GENERAL INFORMATION ON COURSE TEACHER	
Address	Šoltanska 2

Telephone number	+38521557820
E-mail address	ana.marusic@mefst.hr
Personal web page	http://www.mefst.unist.hr/default.aspx?id=2185
Year of birth	1962
Scientist ID	136152
Research or art rank, and date of last rank appointment	Scientific advisor, 2002
Research-and-teaching, art-and-teaching or teaching rank, and date of last rank appointment	Full professor, tenured, 2008
Area and field of election into research or art rank	Biomedicine and Health, Basic medical sciences
INFORMATION ON CURRENT EMPLOYMENT	
Institution where employed	University of Split School of Medicine
Date of employment	2008
Name of position (professor, researcher, associate teacher, etc.)	Full professor, tenured
Field of research	Anatomy, evidence based medicine
Function	Chair, Department of Research in Biomedicine and Health
INFORMATION ON EDUCATION – Highest degree earned	
Degree	MD, PhD
Institution	University of Zagreb School of Medicine
Place	Zagreb, Croatia
Date	1985 (MD), 1989 (PhD)
INFORMATION ON ADDITIONAL TRAINING	
Year	1989-1990
Place	Farmington, CT, SAD
Institution	University of Connecticut Health Center
Field of training	Bone immunology

Results of student evaluation taken in the last five years for the course that is comparable to the course described in the form (evaluation organizer, average grade, note on grading scale and course evaluated)	School of Medicine Split, 4

3.4. Optimal number of students

Optimal number of students per year is 50.

3.5. Estimate costs per student

Estimated student's costs per academic year approximately equal 52 500 kunas/ 7 000 EUR (tuition fees).

3.6. Plan of procedures of study programme quality assurance

In keeping with the European standards and guidelines for internal quality assurance in higher education institutions (according to "Standards and Guidelines of Quality Assurance in the European Higher Education Area") on the basis of which the University of Zagreb defines procedures for quality assurance, the proposer of the study programme is obliged to draw up a plan of procedures of study programme quality assurance.	
Documentation on which the quality assurance system of the constituent part of the University is based:	
• Regulations on the quality assurance system of the constituent part (enclose if existing)	
• Handbook on the quality assurance system of the constituent part (enclose if it exists)	
Description of procedures for evaluation of the quality of study programme implementation: • Fore each procedure the method needs to be described (most often questionnaires for students or teachers, and self-evaluation questionnaire), name the body conducting evaluation (constituent part, university office), method of processing results and making information available, and timeframe for carrying out evaluation • If procedure is described in an attached document, name the document and the article.	
Evaluation of the work of teachers and part-time teachers	The process of student evaluation of teaching is conducted by the Centre / Department for quality in cooperation with the Committee for quality improvement of the departments. The procedure consists of: informing students and teachers, student questionnaire surveys, questionnaire analysis and presentation of results and measures for improving quality. The procedure is described in detail in the Guidelines for conducting student evaluation of teaching, University of Split. Survey is conducted on the last day of each teaching cycle. Analysis and delivery of survey results is the responsibility of the Centre / Department for the quality. Summary of the results for each department are presented to the Dean and to the President of the Committee for Quality Improvement. After analyzing the results of student surveys, dean holds meetings with 10% of worst ranked teachers

	Rector. Also, departments that have received lower ratings hold meetings on improving the quality of teaching. Our School, in accordance with the Regulations on rewards and recognition, rewards each year best teachers, associates and departments according to the results of student surveys.
Monitoring of grading and harmonization of grading with anticipated learning outcomes	The assessment of students at our School is carried out during classes (continuous evaluation) and during the exams. In student assessment the compliance of literature and teaching, as well as literature and the contents of the exam is particularly important. On the School website, under "Department" the curriculum of each department is specified. All teachers are listed in tables along with teaching schedules and units accompanied by chapters from books that are required reading. For written exams, scoring systems are explained in detail. Everything listed above contributes to the organization and execution of teaching, and to better communication with students. The assessment of the acquired knowledge through written exams has become the standard that is applied to all School programs. Committee for teaching, Committee for supervision of the teaching and Committee for Quality Improvement are all involved in the monitoring of the implementation of these procedures.
Evaluation of availability of resources (spatial, human, IT) in the process of learning and instruction	Evaluation of the availability of resources is partly carried out through a questionnaire for student evaluation of expert and administrative services and partly through the evaluation of the overall study program. Evaluation is conducted by the Department / Centre for Quality in cooperation with the Committee for Quality Improvement. The survey is conducted at the end of each academic year. The data is processed and the results are submitted to the Department for quality.
Availability and evaluation of student support (mentorship, tutorship, advising)	After enrolling in the first year, each student is assigned an advisor. The goal of this feature is providing assistance and guidance to students in order to master curriculum as easy as possible. As instructed by the dean and the vice dean for education, student representatives , analyze and timely inform the Dean's Office and the department if one of the students has encountered the problem with the successful completion of each examination in order to ensure timely response. We do not have formal way to evaluate support to students.
Monitoring of student pass/fail rate by course and study programme as a	The process of monitoring student rate of transition is conducted by the Centre / Department for quality using a questionnaire filled out by the School. This activity is carried

whole	out once a year at the beginning of the academic year for the previous academic year. Also, our School carries out internal analysis of students for each subject, exam and
	program after the first exam period, and before the autumn exam period, and the end of the academic year. The procedure is implemented by Student administration, Office for teaching and the departments. The results of rate of transition are discussed in the meetings of the Committee for teaching.
Student satisfaction with the programme as a whole	The process of student evaluation of the entire study program is conducted by the Department for quality in cooperation with the Committee for Quality Improvement and Student administration. This procedure is carried out electronically using EVASYS platform after the defense of the final thesis, and the data processing is conducted by the Department for quality. The results are submitted to the Dean and to the President of the Committee for Quality Improvement. The results of the survey are discussed among dean and vice deans, the Committee for teaching and the Committee for Quality Improvement.
Procedures for obtaining feedback from external parties (alums, employers, labour market and other relevant organizations)	Establishment of the alumni association is in progress. The School is in contact with the Croatian Medical Chamber, the Croatian Employment Service (regional office Split) and other stakeholders, and follows the trends and rates of employment of the staff we train.
Evaluation of student practical education (where this applies)	not applicable
Other evaluation procedures carried out by the proposer	/
Description of procedures for informing external parties on the study programme (students, employers, alums)	On the School of Medicine, University of Split website (www.mefst.hr) all necessary information on study programs, admission requirements and enrollment quotas are provided. Our opinion is that personal contact with potential students is very important and we attend the "The University Fair" each year. We are broadening the presentation of our School by participating in numerous festivals such as "Summer Science Factory", "Festival of Science", "Brain awareness weak" since such events are often attended by prospective students. A significant contribution to presentation of our School is brought by the Herald published by the staff and the students of the School biannually since 2007. We also published the "First student guide for freshmen." These publications, although intended for students already enrolled, can serve as an excellent source of information for all concerned.
