Pursuant to the provisions of Article 50 of the Statute of the School of Medicine in Split, and in connection with Article 10 and Article 11 of the Regulations on Study Programs at the University of Split (October 2021), and the proposal of the Teaching Committee, the Faculty Council of the School of Medicine in Split at its 31st regular session held on 25th and 26th July 2023, adopted the following

DECISION

on the requirements for higher year course enrolment at the integrated undergraduate and graduate study program Medical Studies in English implemented at the School of Medicine in Split

I

This Decision supersedes the Decision on the requirements for subject enrolment and pre-requisites (attending courses and passing exams) of integrated undergraduate and graduate university study programs implemented at the School of Medicine in Split (Class: 003-08/16-04/000; Reg. number: 2181-198-02-01-16-0067) from 11th November 2016.

II

When enrolling a course of a higher year of study, the following general principles for course enrolment and pre-requisites (attending courses and passing exams) apply:

1. In order to enrol the courses of the 2nd year of study program, exams of the 1st year of study program listed in the Detailed Proposal of the Integrated undergraduate and graduate university study program in Medical Studies in English, published on the School of Medicine in Split website must be taken and passed.
2. In order to enrol the courses of the 3rd year of study program, all exams of the 1st year of study program and exams of the 2nd year of study program listed in the Detailed Proposal of the Integrated undergraduate and graduate university study program in Medical Studies in English, published on the School of Medicine in Split website must be taken and passed.
3. In order to enrol the courses of the 4th year of study program, all exams of the 2nd year of study program and exams of the 3rd year of study program listed in the Detailed Proposal of the Integrated undergraduate and graduate university study program in Medical Studies in English, published on the School of Medicine in Split website must be taken and passed.

4. In order to enrol the courses of the 5th year of study program, all exams of the 3rd year of study program and exams of the 4th year of study program listed in the Detailed Proposal of the Integrated undergraduate and graduate university study program in Medical Studies in English, published on the School of Medicine in Split website must be taken and passed.
5. In order to enrol the courses of the 6th year of study program, all exams of the 4th year of study program and exams of the 5th year of study program listed in the Detailed Proposal of the Integrated undergraduate and graduate university study program in Medical Studies in English, published on the School of Medicine in Split website must be taken and passed.

III

Courses of a higher year of study approved for enrolment can be enrolled only on the condition that they do not collide with courses of a lower year that are being re-enrolled.

The Teaching Committee will decide upon the enrolment of a higher year of study on the condition of taking the other course or courses from the same or the previous year of the study program, taking into account the student's ECTS load.

IV

This Decision will be published on the School's website and enters into force on the date of its adoption.
