User registration

You need to be a registered user to access certain interactive CORDIS services like Partners or CORDIS Wire.

1. The username can only contain alphanumeric characters
2. The username cannot contain only numeric characters
3. The username must be at least 6 characters long

1. The password can only contain alphanumeric characters plus the following characters: =-_,;?#%\$Â£{}()[]<>/\
2. The password must be at least 6 characters long
3. The password must contain 2 digits

* mandatory fields

CORDIS Account details: Registration form

* Username:

* Password:

* Password confirmation:

* Title: Mr Mrs Ms Dr. Prof.

* Family name (*surname*):

* First name:

* E-mail address:

* Please indicate if you agree to allow us to occasionally send you general information messages concerning the CORDIS service: no yes

* Organization name:

* Organization type:

* Organization type subcategory:

* Country:

To help us gain a better understanding of the needs of our users, we would be grateful if you could also provide the following (non-mandatory) information.

To display these fields please click [Here](#)

Information provided is for use by the CORDIS service only, and will not be communicated to third parties (see our [legal notices](#)). Your username will be visible to other users if you use the [Partners](#) or [Forums](#) services. Please keep your password secret, and change it immediately if you think someone else has discovered it.

Fit For Health - <http://www.fitforhealth.eu/>

What does Fit for Health offer to entrepreneurs and researchers?

- Individual assistance and consultation through its large network of National Contact Points and experts from 22 countries
- Innovative, target-group specific on-site and virtual FP7 trainings for SMEs and academia, covering proposal writing, grant negotiations and project management
- **Support in finding project partners through the well- established, highly visible SME/researcher profiles database and encouragement of the cooperation of SMEs and academia by special partnering events**
- Making the most of FP7 project results: Support in valorisation of project results by specific valorisation trainings and valorisation partnering events, bringing together SMEs and researches seeking to exploit their results
- Supporting SMEs in acceding and candidate countries in an enlarged Europe by offering dedicated discussion & networking fora
- Supporting European SMEs, SME-associations and clusters in "getting strategic" about FP7 through strategy meetings and trainings that pave the way for a sustainable approach towards FP7
- Bringing together SMEs and researchers seeking to exploit their results

FP7 Partner Search

After your registration you can use our partner search service as follows:

Publish your profile

Interested in participation in EU research projects within the 7 th EU-Framework?

Present your companies or research institutes research field and expertise through filling the proposed profiling form! Your profile will be entered into the Fit for Health database. This will contribute to increase your international visibility and support you to find European research partners.

Fill the profiling form

Publish your partner search

Are you a coordinator of a research consortia preparing a project proposal for an open call in the 7th Framework Programme and look for SME partners ?

Are you are a coordinator of an already running FP7 project and would like to integrate a SME partner on a later stage of your project?

The Fit for Health initiative can help you to find a suitable and competent SME:

Fill the partner search form

Find your project partners

The Fit for Health database offers both profiles of SMEs and research institutes interested in becoming involved in FP7 research projects as well as partner searches of research consortia looking for SME partners.

Search in the database & Find your project partners

PLATBIOMED

Reply to partner search

PROJECT OVERVIEW

PS ID: PS-ES-75987

Status: Open

Date of last Modification: 16/02/2012

Date of Publication: 16/02/2012

Call Identifier: ICT Call 9 (FP7-ICT-2011-9)

Objective: ICT-2011.5.2 Virtual Physiological Human

Funding Schemes: IP

Evaluation Scheme: One step proposal

Closure Date: 17/4/2012

Interoperability is becoming one of the most important bottlenecks in translational medicine. The reason for that is mainly that solutions for a single therapeutic process are usually segmented among the different phases of the health chain, going from diagnosis to therapy and eventually to public health in order to promote a healthier society through prevention rather than intervention.

PROJECT DESCRIPTION

Proposal Outline:

PLATBIOMED's objective is to resolve the interoperability issues between the different sectors of health by designing a platform for benchmarking the tools and standards available to professionals across the silos that interpret distinct levels of data (from OMIC level data to tissue organ data to individual personalised data and finally to the public health data). The ultimate objective of this platform is to break silos that remain barriers to the implementation of new health policies.
