

WEBINAR SEA-EU

Foodborne pathogens: history and transmission

dr Amandine Hauer
Laboratory of Experimental and
Translational Immunology
University of Gdansk

This webinar is a brief introduction of the most infamous pathogens responsible for foodborne diseases. Dr Amandine Hauer will present a selection of bacteria (Campylobacter, E.coli, Salmonella, etc.), viruses (HAV, Norovirus), and parasites (Giardia, Entamoeba, etc.) through their important historical facts, their description, the diseases they are responsible for, and the sources of contamination. This will open your appetite for knowledge about pathogens transmitted by food!

April 4
11:00 am to 12:00 am

Register until March 28
