

**University of Split School of Medicine**  
**Scientific Wednesday/ Znanstveni klub srijedom**

**Wednesday, 1<sup>st</sup> June 2016**

**Come and meet Ms Lindsey Sikora, a member of the IMPACT Observatory from the University of Ottawa and learn about librarian perspective on literature review and how to find the literature you are interested in.**

**Program**

**Part 1: Lecture: From the literature to analysis: A librarian's perspective on systematic reviews**

time: 12h00 -13h00

Location: B103

Librarians are often involved in the research cycle, especially when working with researchers on systematic or scoping reviews. However, a librarian's experience with the different steps in a systematic or scoping review may vary. In this lecture, we will explore the various roles and expertise that librarians can provide to a researcher in the systematic review process, from providing more traditional experience with searching databases and bibliographic management, to more unique roles with creating protocols and advising on critical appraisal tools.

**Part 2: Workshop: Free medical resources**

time: 14h00- 16h00

Location: Medical library

Medical resources, from databases to apps, often have a heavy price tag attached to them. Come learn about some **free** resources that you can use to further your medical career! From PubMed (and its various tools) to different medical apps, you'll learn about resources that may be right for you.

## **Lindsey Sikora, MIST**

**Lindsey Sikora** is the Interim Director of the Geographic, Statistical and Government Information Centre, and Social Sciences Library at the University of Ottawa. She obtained her Masters of Information Studies from the University of Toronto, and her Bachelors of Science (Hons) in Behavioural Neuroscience from Laurentian University in Sudbury, Ontario. She has worked collaboratively with many research groups on scoping, rapid and systematic reviews within the areas of medicine and health sciences. Her research interests are primarily focused on information literacy, assessment, patient-centered care and shared decision-making, and research methodologies. Lindsey is also a member of the IMPACT Observatory network.
